C6 CARBON FIBER AIR INTAKE

The Corsa Performance C6 carbon fiber air intake features hand laid, aerospace grade carbon fiber construction and is designed for unparalleled aesthetics, maximum strength, and minimum weight. Featuring CORSA's high performance DryTech 3D no-oil filtration and engineered to optimize airflow the intake produces up to 21 Horsepower and 30 Foot Lbs of Torque while keeping air temperatures up to 10 degrees cooler than the stock intake.

- 100% Carbon Fiber Construction
- Machined Aluminum Mass Air Flow Mounting Plate
- Outflows Stock Intake creating more HP & TQ
- High Performance DryTech (No Oil) Synthetic Filtration
- Installs in 30 minutes or less
- Limited Lifetime Warranty
