APPLICATIONS

CORSA Performance's oil catch cans are the latest in a line of performance parts designed to maximize vehicle performance and longevity. Made from 6061 aluminum and featuring a multi-stage oil separation system, CORSA Performance oil catch cans work to eliminate blow-by vapors of gas, water, oil, and particulates from the airpath. Oil catch cans prevent damage to sensitive intake components and help reduce carbon build-up on valves that over time reduce engine performance. CORSA Performance oil catch cans feature OEM style quick disconnect fittings, premium automotive-grade hoses and upgraded components to ensure your vehicle runs at peak performance.

- Multi-Stage oil separation system
- Lightweight Aluminum construction
- Easily servicable for routine maintenance
- Secure quick disconnect fittings
- Robust powder coated aluminum application specific bracket
- Helps maintain engine longevity and performance
