

FEEDING INSTRUCTIONS

LAMPLEY'S A-Z:

Feed one full (4 ounce) scoop twice daily, for 1000 to 1200 lbs. of body weight. For younger animals, feed one ounce per 300 lbs. of body weight.

LAMPLEY'S HI-PHOS A-Z:

If you are feeding some alfalfa hay (alfalfa hay is high in calcium which creates a direct imbalance of phosphorous), *Hi-Phos A-Z* has the additional phosphorous and phosphorous-digesting enzymes to help balance the diet.

Feed twice daily to every horse according to the directions on label.

BASIC MINERAL:

For **routine monthly** use for horses, cows, goats, sheep, cats, dogs, etc.: Add 16oz of Basic Mineral to the grain per 1000 lbs. of body weight. Add enough water to make a wet mash (sloppy wet). Feed **twice** a day for 2 days straight and repeat the following month. Then every other month thereafter.

For horses with **EPM** and cows with **Johnes**: Feed three 8-ounce or six 4-ounce measuring cups in grain three times daily for 14 days, possibly longer. Add enough water to make a sloppy wet mash.

LAMPLEY'S EXTERNAL RUB:

External Rub is used as a topical application to be used in cases of injury and wounds, tendon problems, bucked shins, etc. It may be painted on the coronet band for a horse that isn't growing enough hoof. Paint on the bottom of the hoof for bruising, but **do not** use iodine at the same time as this combination creates heat. When using below the knee, clip the hair as close as possible and apply *External Rub* to the area where it will be absorbed and can be used immediately by the injured area. You can also use *External Rub* as a sweat wrap.

FORMULA M:

For Cows, Brood Mares & Breeders: Top dress one heaping teaspoon twice daily, per head (1000 to 1200 lbs. body weight).

TMR instructions: For animals of breeding age feed at the rate of 2 pound per 50 head (1000 lbs. body weight each). TMR should be mixed and fed twice daily.

FORMULA N:

Feed ½ teaspoon 2 times a day. It is super concentrated, as concentrated as we can make it. Do not use *Formula N* when increased circulation could pose a problem, as in recently gelded horses or with cases of fresh wounds.

FORMULA 7:

Feed horse or cow one rounded teaspoon twice daily per 1,000 pounds of body weight.

FORMULA 25:

Mix 10-12 teaspoons with 1 quart of cool water in blender. Feed 2 ounces 2 times daily for a few days. Refrigerate after mixed.

FORMULA 45:

Feed one rounded teaspoon twice daily per 1000 lbs. of body weight.

FORMULA 49:

Feed full strength either dry or with just enough water to make a paste. **Do not** mix with anything else. Put directly into the mouth. On the first day, feed one rounded teaspoon every half an hour for 4 hours straight and then 3 or 4 more times throughout the day. Each additional day, feed one rounded teaspoon 3 to 4 times daily for minor cases or 6 to 10 times daily for severe cases. Repeat every day until all symptoms are gone and horse is completely sound. Feed only Grass Hay and Water. Stop all grain, stop all medication, and stop all alfalfa hay.

HERBS, VITAMINS and MINERALS:

Feed 2 teaspoons 2 times a day.

LAMPLEY'S HORSE SENSE:

Feed a well-rounded teaspoon twice daily; if the horse starts acting normally, or more the way you want, continue feeding one well-rounded teaspoon twice daily for another 2 weeks. Then reduce amount to one level teaspoon twice daily. After another 2 weeks, if the horse is still normal give ½ teaspoon twice daily for 2 weeks. Finally, if the horse still appears normal, stop supplementing with *Horse Sense*.

LAMPLEY'S MINERAL & PROTEIN:

Feed 1 teaspoon 2 times daily.

LAMPLEY'S RACING FORMULA:

Feed 2 teaspoons 2 times daily—Start two weeks before the season and feed throughout the season.

LAMPLEY'S VITAMIX:

For cows & horses: Feed 1 scoop, (two ounce measure) per 1000 to 1200 lbs. body weight, 6 times daily at least 1 hour apart. Call for instructions to administer by top dressing or in TMR mix.

For calves: Feed 1 level TEASPOON twice daily in milk for all newborns (weighing an average of 100 lbs.). Measure according to body weight. If needed, give up to 4 additional doses per day between feedings at least 1 hour apart. Call for additional instructions. If they are on any kind of medication, call BEFORE starting them on Vitamix. (Stop all medications before starting Vitamix.)

WHITE LIGHTNING:

For colic: feed 1 heaping teaspoon directly into mouth or make a paste and syringe into mouth. In 10 minutes repeat if needed. Can be fed every 10 minutes until symptoms are gone.

For seizures, trauma, poisoning and snakebite: For emergency cases feed one heaping teaspoon every 10 minutes, as needed.

Feed one heaping teaspoon 3 times daily when **maintenance** is needed.

WOUND POWDER:

Disinfect wounded area then sprinkle *Wound Powder* on wound after applying *Lampley's External Rub*.
