

# Spring-O-Bingo!

Let's play outside and explore our beautiful world! Can you find any of these in your local park or backyard? (Find 3 in a row and say "Bingo!")

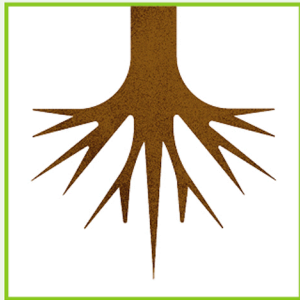

Reusables help make less litter. Reduce, Reuse, & Recycle.

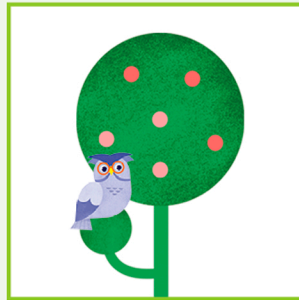

Fruits are a delicious and nutritious gift from nature.

Earth worms build soil health! They like living underground.

Tree roots keep trees alive and help prevent soil erosion.

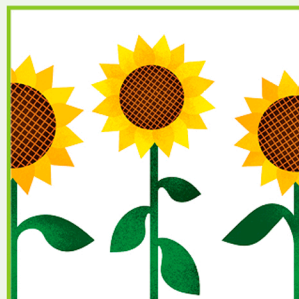

Trees keep our air clean & cool. Some bugs and birds live in trees.

Ladybugs are protectors. They eat bugs that hurt plants.

Bees are pollinators. They help turn flowers into fruits.

Flowers aren't just pretty, their pollen is a source of food for many bugs.

Litter is trash that needs to be picked up. Don't forget to Recycle!
