Headlights Installation video

Filming Frame Guide

Latest update: Jan.8 2024

1. Get the gear right

Cameras and smartphones are recommended for filming installation videos. The graphic settings should be no less than 1080p Full HD.

2. Show us your vehicle

SHOWCASE

Car brand
& Car model

To assist others with the same vehicle as yours, please capture a clear photo or footage of your car's brand or logo

3. Show you product

SHOWCASE

The Package Headlight model

Please provide a clear demonstration of the headlight model you purchased and showcase the packaging

4. Take off your old bulb

SHOWCASE

Unclip process
Old bulb model
(If Possible)

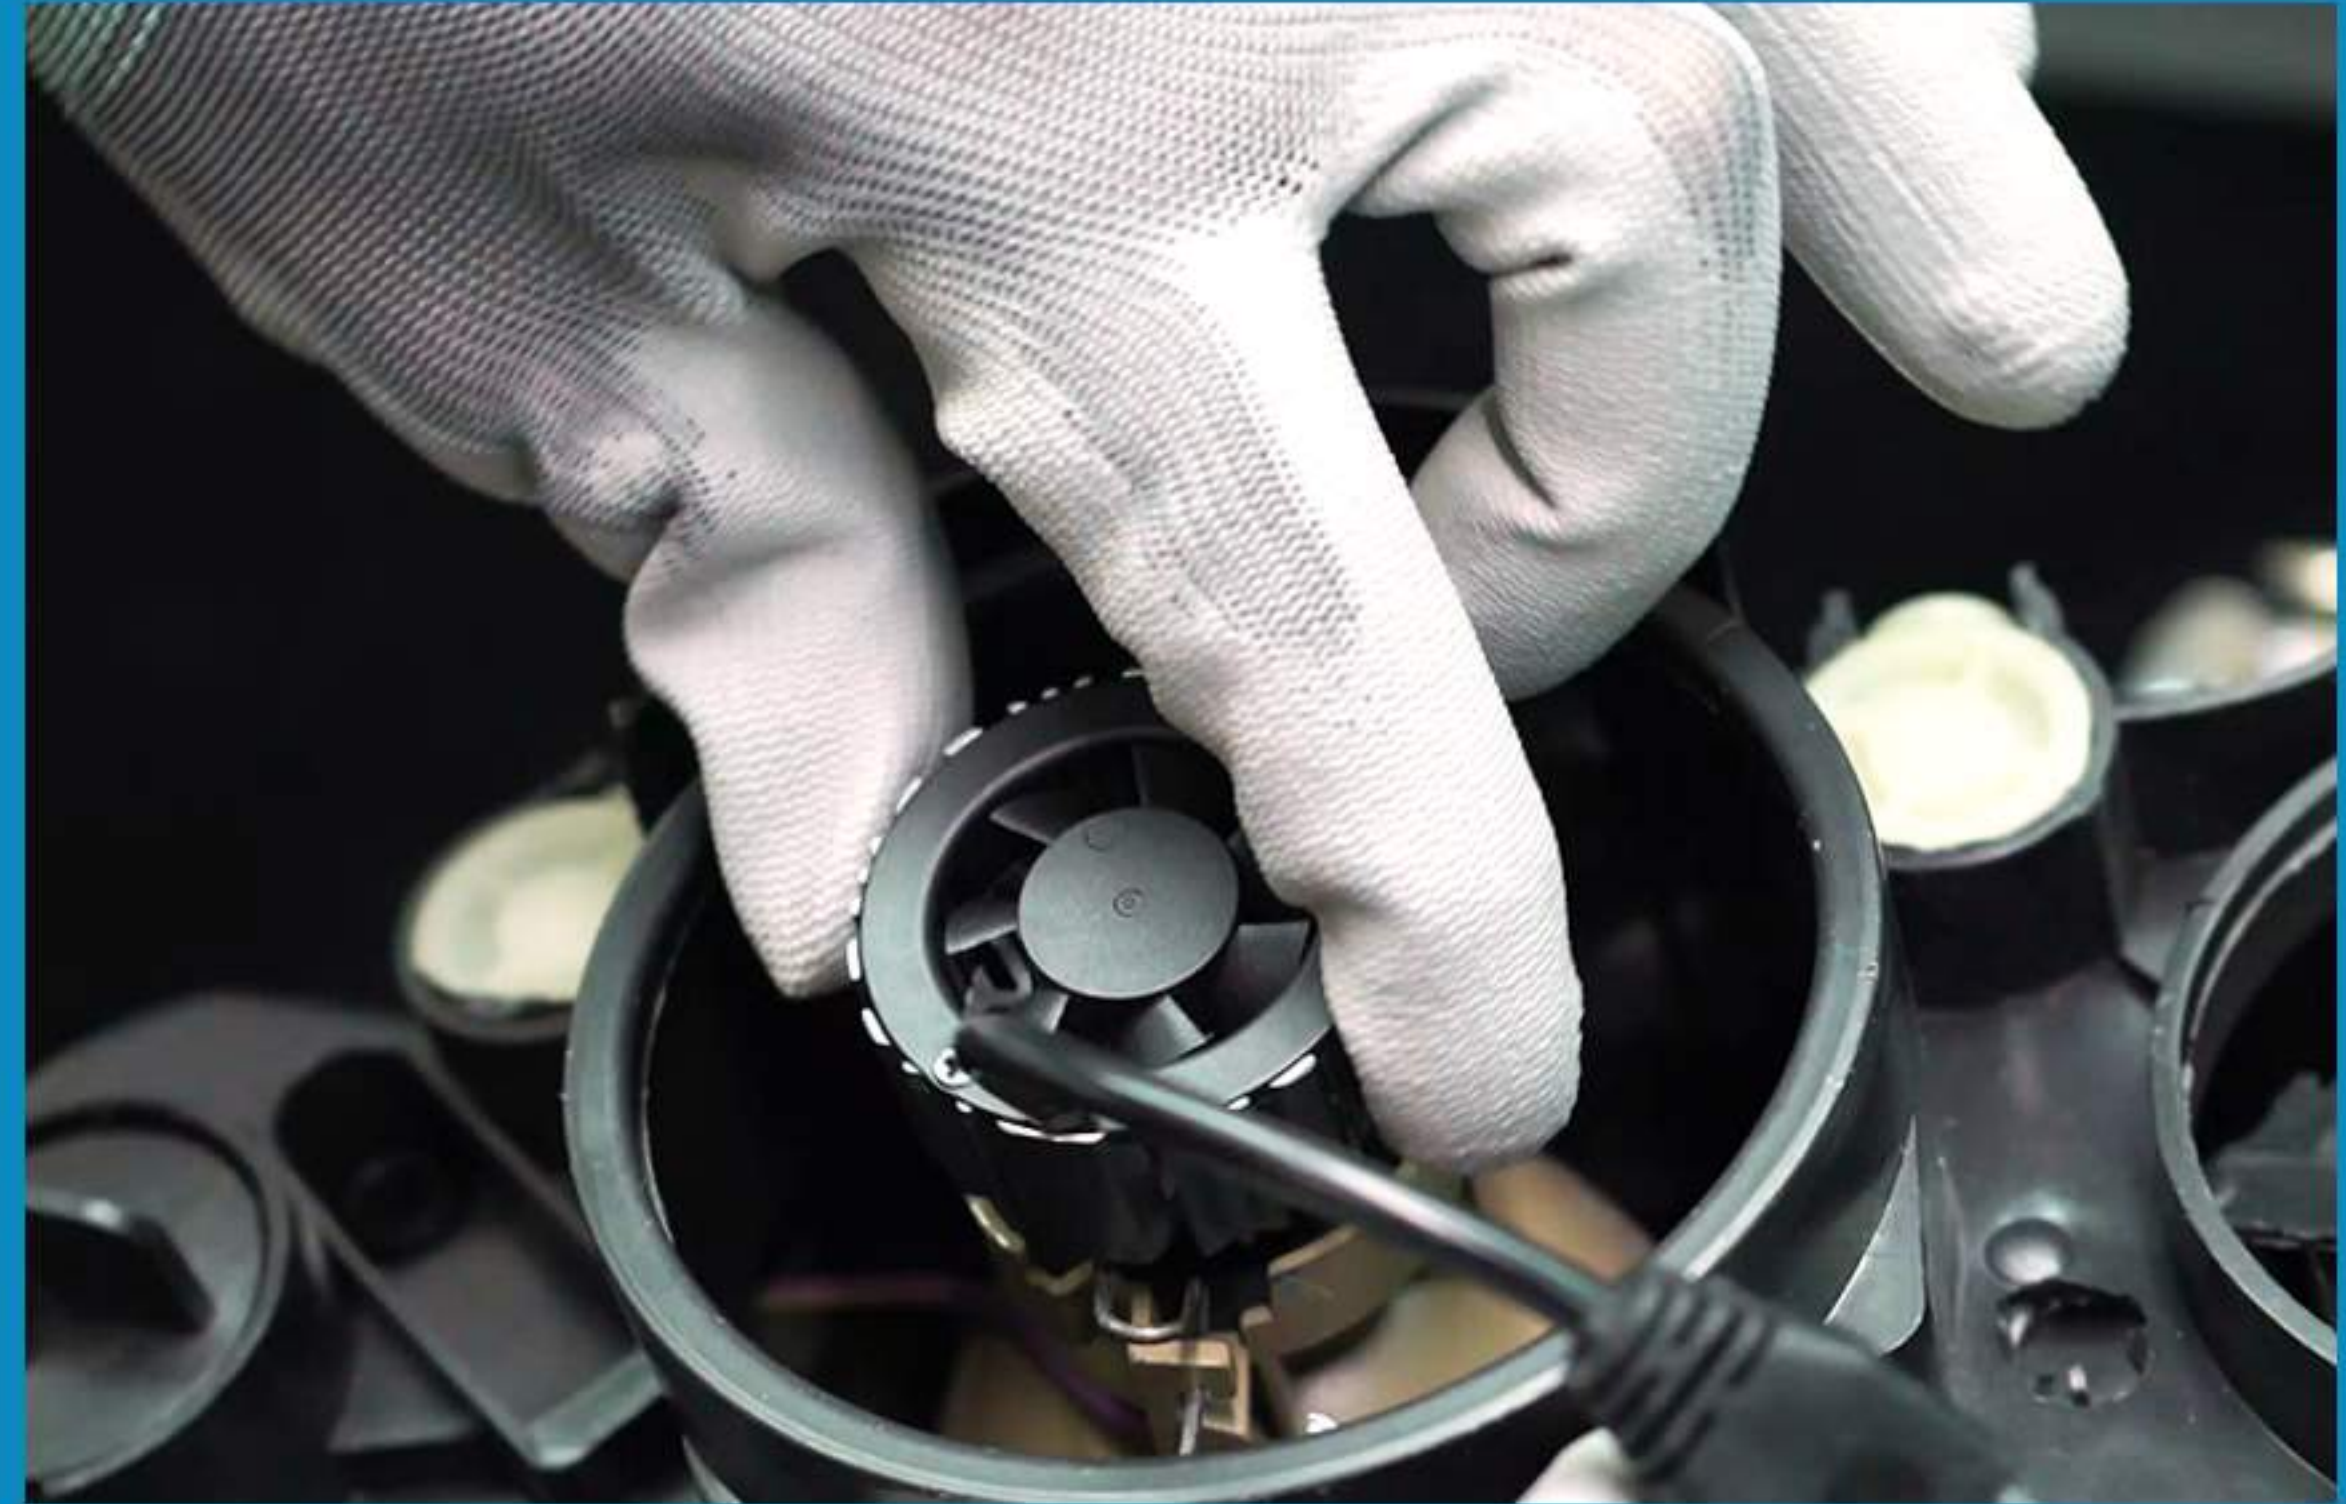

Please demonstrate the process of removing the original headlight bulb. If possible, also showcase the model of your old light bulb.

5. Put on the new light

SHOWCASE

Installation process
How you remove dust cover
(If applicable)

Please demonstrate the process of installing the new headlight on your vehicle. If possible, also showcase the removal of your dust cover.

6. Switch on the headlight

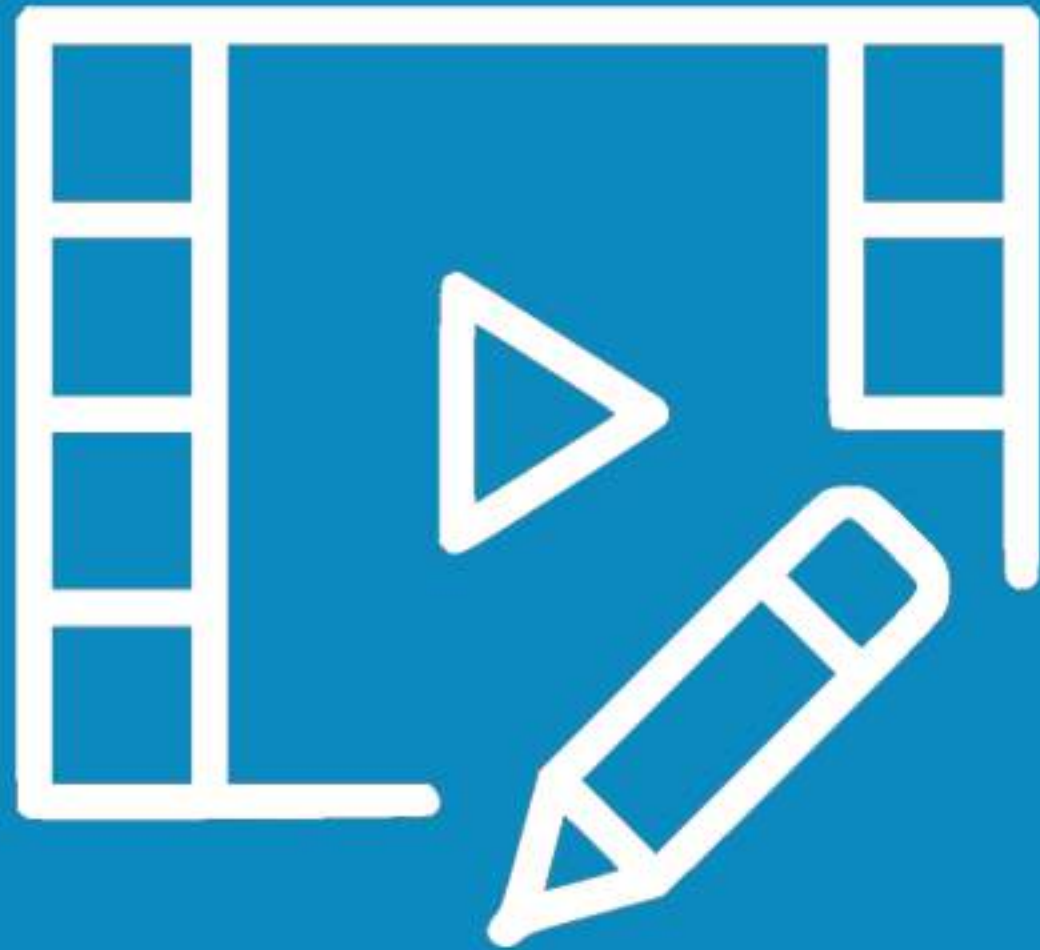

SHOWCASE

Switch on the headlight
Front view showcase the light
(optional)

After the installation, please switch on the headlight and demonstrate the light beam. If possible, take a front view shot of the headlight to showcase its function more effectively

7. Edit the video

By you

OR

Send us

After shooting, edit your exciting film! You can either edit it yourself or send us the footage. Our professional video editor will assist in creating something great!
