

Does your company or organization have an

AED EMERGENCY RESPONSE ACTION PLAN IN PLACE?

An En-Pro Customer is a Happy Customer...

En-Pro is a hassle-free web-based computerized program that provides you with the necessary tools to ease the maintenance of your Automated External Defibrillator (AED) units. En-Pro ensures that all of your AED units are always up-to-date, maintained, and ready for use in case of a medical cardiac arrest emergency, as well as providing you with the necessary laws and regulations applicable to your state. This specialized maintenance program will even go as far as providing your organization support and guidance in the process of "Post-Event" in the chance that you would have to use your AED device and provide you with the necessary steps to take after a medical emergency has occurred.

1. Readiness

ZOLL

- En-Pro keeps track of expirations dates of your pads and batteries for each AED unit.
- En-Pro will send you email notifications to remind you when your pads and batteries need to be replaced.
- En-Pro provides you with routine inspections and will send you an alert if it detects that your AED unit(s) is out of maintenance.
- **Having the readiness component provides you with peace of mind and assurance that your AED units are always updated, maintained, and ready to use at all times!**

2. Compliance

- En-Pro gives you easy access to AED laws and regulations for your state.
- En-Pro keeps track of all of your important documents such as the physician's script, the Good Samaritan Laws for your state, and other important documents.
- **Since all 50 states requires AED maintenance, by having the compliance component, you can access all of the important documents that apply to your state at the click of a button!**

3. Post-Event

- En-Pro provides you with the support and necessary steps to follow after an AED unit has been used.
- En-Pro provides you with the guidance of necessary information that you need to report to emergency medical services, as well as a response plan.
- En-Pro also provides you with a loaner AED unit while EMS have your AED so that they can download the data from the event.
- **With the post event component, you can be rest assured that you will have the appropriate guidance on what to do after an AED has been used!**
