Step 1 - Unclip the end of your run

If you already have a complete Eglu Go Up run,
you will need to unclip the end and corner skirts.
(Keep the clips, you will need them later.)
Also, remove the feeder and drinker.

Your run will then look the picture to the right.

If you are building an extended Eglu Go Up
proceed to Step 2.

**Step 2 - Attach Side Panels and Run Extension Supports**
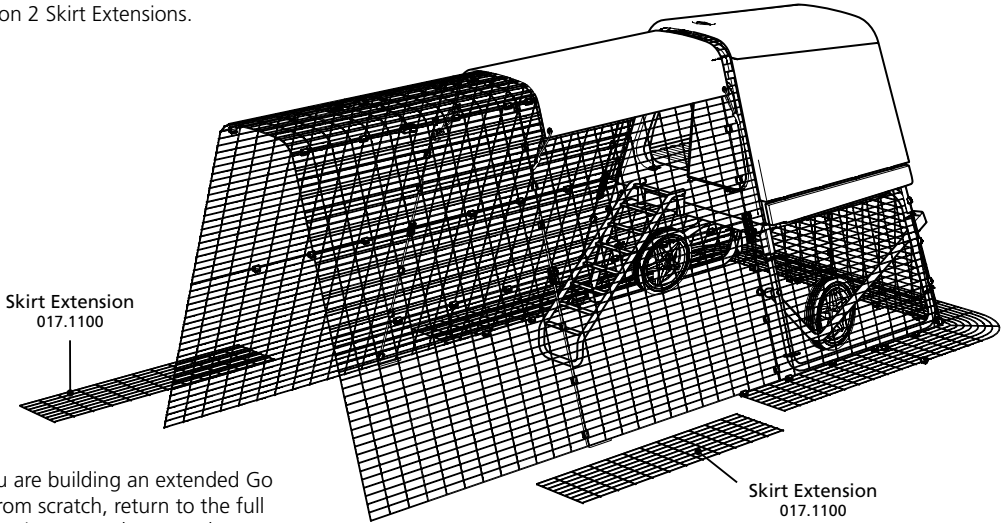

Clip on 2 Side Panels and 1 Run Extension Supports.

If you are building an extended Go Up from scratch, return to the full instruction manual to complete your run.
If you are adding more extensions, repeat Steps 2 to 4.

Step 5 - Re-attach the panels removed in Step 1

Re-attach the end of the run using the clips that were holding it on before.
