

CubiScan 100

Captures dimensions and physical weight of boxed items. Maximum capacity: 24" x 24" x 36" and 100 lbs.

CubiScan 30

Captures dimensions and physical weight of books, CDs, and tapes. Maximum capacity: 15" x 15" x 6" and 10 lbs.

CubiScan 110

Captures dimensions and physical weight of boxed items. Maximum capacity: 30" x 24" x 36" and 100 lbs.

CubiScan 125

Captures dimensions and physical weight of small parts, irregular shapes, and boxed items. Maximum capacity for boxed items: 24" x 24" x 36". Maximum capacity for irregular items: 18" x 18" x 12". Weight capacity: 50 lbs.

CubiScan 200-TS

In motion cubing and weighing system. Maximum capacity: 60" x 48" x 36" and 242 lbs. Conveyor speed: 230 feet per minute.

CubiScan 150

Captures dimensions and physical weight of boxed items. Maximum capacity: 48" x 39" x 40" and 150 lbs.

CubiScan 210

In motion dimensioning system. Maximum capacity: 60" x 48" x 36". Conveyor speed: 600 ft. per min.

CubiScan 1200-AKL

Ceiling or floor mounted system for capturing dimensions of palletized freight. Can be made portable. Has a measurement range of 6" x 6" x 4" to 8' x 5' x 9'.

Cubing: It's all we do

Quantronix has worked since 1987 on one thing and one thing only: **CubiScan® cubing and weighing systems.**

Warehouses and distribution centers have looked to the CubiScan line of dimension scanning equipment to realize increased operational efficiencies by feeding host systems accurate cube and weight data for master packs, inner packs and eaches. The dimensional data collected by CubiScan equipment helps logistics and material handling managers:

- 1) Maximize storage space and slotting assignments
- 2) Select proper carton sizes for order packing
- 3) Determine optimal load planning and pallet stacking configurations
- 4) Calculate dimensional-based freight charges for manifesting

Using a CubiScan is quick and accurate – so, put away your labor-intensive and error-prone tape measure and let a CubiScan work for you.
