

Showing 3" toe length using the Vernier scale

2" shows the approximate center of articulation and widest part of the foot

.75" apex of the frog

End of evaluator indicates approximate tip of coffin bone

**note US inches on this side of evaluator*

Evaluator can also be used in this way with the Vernier scale.

**note metric measurements on this side of evaluator*

Helpful for determining bar distortion. Use the edge of the evaluator: each leg represents .25"
