

### How to take the perfect picture of your Doodazle creation.

- 1) Make sure you are taking the picture in **good, natural light**. We want to see the picture as clearly as possible to ensure that we capture all the colours, love and attention you have put into your drawing!
- 2) Please make sure you are photographing our template and send through the original picture. We can't really use screenshots as they don't come up as clearly. And please **get as close as you can** so we have a lovely clear shot of the whole template.
- 3) We want a beautiful, **crease free template** (ideally, though we know sometimes little hands crease things!). The smoother the paper, the better the picture.
- 4) **No shadows please!** These won't look good when we print your picture!
- 5) And please try to stay still when you take the picture! **Blurred shots won't work!**

Most of all, you must **have fun**, engage your **creativity** and your **imagination**.  
Each design will be completely unique, just like you!
