R&B Wire Products was started in 1946 in a small tin shed in Maywood, California. Shortly thereafter, the “Self Service Laundry” industry was born. Responding to the need for personal laundry transportation, we invented the first wire laundry cart. Since then, our research and development team has been responding to the needs of our customers, which has expanded our product offering to not only include wire, but also tubing, sewn and roto-molded products. Three generations later, we continue to manufacture hundreds of high quality products used throughout many different industries to make material handling jobs a breeze.

American innovations since 1946.
