# Curtain Hardware

## **Brass Grommets**

- Made of wrought brass
- Packed with washers; 100 per box

Cat #	Size	Dia. Hole
H20310	0	1/4"
H20311	1	5/16"
H20312	2	3/8"
H20313	3	7/16"
H20314	4	1/2"
H20315	5	5/8"
H20316	6	3/4"

## **Grommet Hole Cutters**

- Made of forged steel
- Will cut clearance holes for corresponding size grommets

5120 5101		
Cat #	Size	Dia. Hole
H20370	0	1/4"
H20371	1	5/16"

# **Drapery Spring Snap** #SN2226

- Made of wrought steel and a nickel plated finish with a sturdy spring snap
- Easy way to hang curtains

# Rigid Eye Strap Snap

• One end has a loop eye for strap and the other end has a flat spring eye

Cat #	Sizes
SN23401	1"
SN234011/2	1 1/2"

## "S" Hooks

• Made of blunt wrought steel with a plain finish

Cat #	Sizes
CT27111/2	1 1/2"
CT2712	2"
CT27121/2	2 1/2"
CT2713	3"

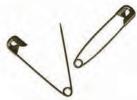

# **Light Duty "S" Hooks**

• Made of wrought steel wire with a plain finish

Cat #	Sizes
CT2831	1"
CT28311/4	1 1/4"
CT28315/8	1 5/8"

# Safety Pins

#SNSP

- Length: 2"
- 144 pins in a gross

# Nickel Steel Bank Pins #SNNSBP

- Length: 2"
- 1/2 lb box

# Blanket Pins #SNBP

- Used where large safety pin is needed, such as pinning back soft goods
- 4" length

# **Fusible Link**

#CT7519

- Used wherever a curtain, door or other fixture is constructed to close automatically upon exposure to heat
- Will melt at 160 degrees; other temperatures can be supplied upon request

# Stage Curtains & Hampers

## **Stage Curtains**

We have been helping people with their curtain needs since 1950. Since a front curtain represents a considerable investment and is something that will be visible to your administration and audience for a long period of time, quality is very important. Our curtains are made from the finest fabrics and quality workmanship.

We will be happy to supply quotations on curtains, drops, scrims, cycloramas, etc in a variety of materials at no cost or obligation to you.

Most public spaces are required to have their curtains and drops flameproofed. The best fabric for making your curtains, and meeting the fire code requirements is to use synthetic velours. They are inherently flameproof (IFR) for the life of the fabric and do not rot or fade like traditional cotton velours. IFR fabric costs more but is worth it!

## Front Curtains, Travelers and Legs

- Fabricated with 50% fullness, box pleated, webbing, and grommets at top on 12" centers
- Chain weight in separate pocket at bottom
- Provide height and width of each panel when requesting a quotation
- Recommended fabrics: Velour, Commando, Cloth, or Duvetyne
- If hanging on a batten pipe, specify tie lines
- If hanging on a traveler track, specify sewn snap hooks

### **Borders and Valances**

- Generally made of the same fabric as the corresponding curtain
- Fabricated with 50% fullness
- Webbing and grommets at top on 12" centers with tie lines for hanging
- Hem or chain weight in separate pocket at bottom
- Provide height and width when requesting a quotation

#### **Drops and Cycloramas**

- Fabricated flat with webbing and grommets at top and tie lines on 12" centers
- Specify chain weight in separate pocket or a sewn pipe pocket (pipe not included)
- They can be made seamless, but these are much more expensive than seamed drops
- Seamed pieces up to 18' usually have one seam, up to 27' two seams and up to 36' three seams
- Recommended fabrics: Muslin, Canvas, or Duck

#### **Scrims**

- Seamless, transparent drops
- The best material is Sharkstooth because it is opaque when lit at a 45° angle from the front and "dissolves" or becomes transparent when lit from behind, as the front lights dim out
- Aniline Dye or Rosco Supersaturated Paint are used to paint scrim materials because the scrims maintains its translucency
- Sewn flat with webbing and grommets at top and tie lines on 12" centers
- Colors available: white-when painting a scene, black-when creating a mysterious "dissolve" effect, and blue-when projecting color light effects or as a sky backdrop
- Specify chain weight in separate pocket or a sewn pipe pocket (pipe not included).

# **Curtain Storage Hampers**

- Canvas hamper with a sturdy plywood top hinged to the body and fitted with hoops for locking
- Excellent for storing curtains or soft goods as well as transporting cable and rope)
- Available with or without high quality Darnell casters.
- Hampers stack for easy storage
- We reinforce the hampers with 1" x 4" clear pine to support heavy loads before we install Darnell Swivel Casters. No other supplier offers this high quality caster as an improvement to the hamper. We also can do custom fabrication of hampers. Please contact a salesperson.
- These hampers ship via common carrier. Allow for freight charges

# **Drop Holder**

#### #H2064

- Used to gathered the fabric of a drop or scrim for storage on a pipe
- Clamp cannot be opened except by hand
- Size: Length 12" Width 2"

# Scenic Fabrics

## **Fabric Pricing**

- Prices of the following fabrics are per running yard, not per bolt (i.e. 1 yard of 30' wide Sharkstooth Scrim is 3' x 30')
- Bolds vary in size from 50 yards to 100 yards, however, you get the bolt price if you order over 50 yards
- If the fabric is rolled, we would appreciate you taking the whole roll if it is within your budget
- Cut prices apply when less than 50 yards is ordered

## **Colored Fabrics**

 When ordering a colored fabric, such as Sky Blue Muslin, Velour, Commando Cloth, or Satins, be sure to order a sufficient amount of yardage. Dye lots vary and we cannot guarantee that the colors will match on different orders.

## **Shipping Fabric**

• Please note that we have provided the approximate weight per bolt and per yard. The weight per bolt can help you determine whether the fabric has to shipped by truck. The maximum weight UPS will handle is 70 lbs, so anything over that will have to ship via common carrier and that can be costly.

### Roll vs Bale

- Rolled fabrics cost more and are very handy to work with. Bales are very inexpensive but require additional handling
- We have indicated the roll sizes below. Again, we would appreciate your taking the whole roll if it is within your budget

## Flameproofed vs. Inherently Flameproofed

- Flameproofed fabric is expensive but may be required by the theatre's local and state fire laws. The flameproofing process shrinks the fabric quite a bit, so it doesn't tighten well on a frame
- Non Flameproofed fabric is significantly less money than flameproofed and shrinks very nicely around a frame. It is possible to flameproof the fabric while you are priming it.
- Inherently Flameproofed fabric is expensive but totally worth it. This synthetic form of velour is flameproofed for the life of the fabric. It is completely resistent to rotting and fading. If you are buying curtains for installation in a public space, use Inherently Flameproofed Velours!

## **Drop and Flat Fabrics**

- Muslin and canvas are the most popular fabrics for painting scenic drops, cycloramas and for covering flats.
- Canvas is recommended if the drop is going to be painted repeatedly and if the drop will be handled alot.
- Grounded cloths are generally made of 12 ounce canvas because it is the most durable.
- Narrow fabrics are used to construct flats and wide widths are used for cycloramas and drops.
- Wide fabrics are expensive because they are imported. The best buy on wide fabrics is the 120" and the 108".
- Canvas comes in various weights such as 8 oz (8 oz per square yard) or 12 oz.
- Muslin is sold by the number of stitches per inch such as 128 count or 140 count. A tighter weave (140 count) is considered a heavy weight muslin. Flameproofed muslin shrinks so much it seems like a 140 count muslin.

# Scenic Fabrics

## **Scrim Fabrics**

- All fabrics diffuse differently and have limited large scale applications due to the narrow widths
- Aniline Dye and Rosco Supersatured Paint are used to paint scrims while maintaining its translucent quality
- The wide width makes seamless drops possible

#### **Sharkstooth Scrim**

- This material is opaque when lit at a 45° angle from the front and "dissolves" or becomes transparent when lit from behind, as the front lights dim out
- Scrim is flameproof

Cat #	Width	Color	Weight (per yd)
SFSS30'FCBK	30'	Black	2 lbs

SFSS15'FCW	15'6"	White	1 lb
SFSS30'FCBL	30'	Blue	2 lbs

## **Jute Webbing**

- Used to reinforce drops and curtains. Enables unit to hang without tearing at the edges
- Sold in 72 yd roll

Cat #	Width	<u>Color</u>	
SFJW	3 1/2"	Natural	

#### **Theatrical Gauze**

- In addition to it's use as a scrim, it is used for set pieces such as rocks, (before painting), and for texturing painted flaps. Gauze is also used to cover windows in flats
- This fabric is expensive but versatile

Cat #	Width	Color	Weight (per yd)
SFTG72FCBK	72"	Natural	.3 lb

#### **Erosion Cloth**

- Rough, textured, brown cloth used for backgrounds and decorative purposes
- Excellent for casting rough grid-like shadows
- Cloth is non-flameproofed
- Sold by the yard

  Cat # Width

  SFEC48N 48"

## **Burlap**

- An economical scrim that can also be used for set pieces such as rocks
- · All natural color

	Width			Weight	Weight
Cat #	FP & NFP	Weave	On Roll	per Bolt	per Yard
SFBL	36" NFP	Loose	No	n/a	n/a

## **Scenery Netting**

- Has one inch hole and is used to hang set pieces and for decorative purposes
- Scenery Netting is non-flameproofed

Cat #	Width	Color
SFSN30'NCBK	30'	Black
SFSN30'NCNT	30'	Natural

#### **Cotton Net**

- Similar to fishnet stockings
- · Allow two weeks for delivery

Cat #	Width	Color	Weight (per yd)
SFCN072FCBK	72"	Black	.3 lb
SFCN216FCBK	216"	Black	2 lbs
SFCN072FCW	72"	White	.3 lb
SFCN216FCW	216"	White	2 lbs

#### Cheesecloth

- This low cost fabric is finding more and more usage in theatre and decorating
- It is used in costumes, in sets to simulate the appearance of glass (as in windows), and to decorate windows
- The 58" medium cheese cloth is a good scrim material
- All cheesecloths are non-flameproofed

Cat #	Grade (or mesh)	Width	Yardage/Bolt
SFCC58NC	Medium	58"	Specify Cut

## **Curtain Fabrics**

• Used to mask walls and areas and used to fabricate stage curtains

### **Duvetyne**

- An economical, napped weight fabric
- Not recommended for concealing windows

	Width			Weight	Weight
Cat #	FP & NFP	Color	On Roll	per Bolt	per Yard
SFD54F	54" FP	Black	50 yds	40 lbs	.8 lb

Please add a "C" to the Cat # when ordering a cut piece less than 50 yards

#### **Commando Cloth**

- This fabric has an improved pile over duvetyne; rich looking but economical
- Black is the only color we stock

	Width		Weight	Weight	
Cat #	FP & NFP	Color	On Roll	per Bolt	per Yard
SFCC54FBK	54" FP	Black	50 yds	50 lbs	.5 lb

- A combination of woven plastic and thread creates this elegant, shimmering material

Roll - 47" x 10 yds Bolt - 47" x 110 yds

# Flameproofing & Gamma Seal

Your theatre's local Fire Department has codes governing the flammability of materials used on stage. It is important that you know these fire codes. If you are thinking about using flash effects during your performance, chances are good the Fire Department will pay you a visit. Since most flameproofing compounds protect for approximately one year, complying with the code can be quite a task.

The fabrics used to construct stage curtains are usually flameproofed and these fabrics are easy to treat while they hang by spraying the back of the fabric with the proper solution.

Flameproofing scenery and the stage can be challenging. Basically the wood frames and stage should be coated with W40 flameproofing solution. Scenic fabric, if not already treated, can be flameproofed during the sizing process. Painting the scenery with a casein paint is the best option because it will not support a flame. If you want to paint with latex acrylic paints, we stock a flameproofing paint additive.

Flameproofing can be applied many ways, such as with a roller, brush, sprayer or by immersion. If you are using a brush or roller, allow the solution to soak through and dry before applying paint. Spraying is the fastest way. Try the #HS223 P-50 Hand Sprayer, which is an excellent paint sprayer as well. Drops can be dipped into the solution, gently wrung out and hung up to dry. Be sure to use a large enough container for soaking to insure that all the fabric is treated.

Warning: If you get flameproofing products in your eyes, wash immediately with water. Follow with a soothing eye solution from a drug

## Flameproofing Solutions

• When the following products are applied, they render materials flame-retardant according to NFPA701

# Roscoflamex C26

## #RFX7926

- An improved version of Rosco's original flameproofing for cotton muslin and canvas
- The Roscoflamex C26 can be diluted with 2 or 3 gallons of water depending on the fabric's thickness.
- Coverage approx 200 to 400 square feet
- Sold by the gallon

#### P-50 Fire Retardant Paint Additive

- Formulated to easily mix with standard water based acrylic latex paint. Designed to raise the ignition temperature of the paint to provide Class A flame spread rating
- It will not affect the characteristics or color of the original paint
- · Shelf life: five years
- Add 12 oz unit per gallon of paint
- Tested in accordance with ASTM E-84.

Cat. # Quantity

FLFR1 1 - 12 oz unit

FLFR12 12 - 12 oz units per case

# Roscoflamex W40

## #RFX7940

- · Rosco's flame retardant for raw wood
- The liquid is premixed and ready for use
- Coverage approx 200 square feet
- Sold by the gallon

Do not use Roscoflamex with metallic paints.

## Roscoflamex S33

### #RFX7933

- A formulation for treating synthetics including polyester, nylon, acrylic, rayon and a variety of blends
- Premixed and ready to use
- Run tests before flameproofing fabrics with a shiny surface or ornaments such as tassels
- The compound has a tendency to leave a gritty substance and may discolor the fabric
- Coverage approximately 200 square feet
- Sold by the gallon

#### Gamma Seal Lid

#### #PCGAMMA

- Transforms most 12" diameter plastic pails (or 5 gallon pails) into leak proof, airtight storage containers that protect the contents from exposure to the environment
- The Gamma Seal lid does not require cutting tools or lid removers
- The lid is removed with a gentle turn of the wrist

# Scenic Color Chart Lemon Yellow Golden Yellow Chrome Yellow **Bright Yellow** Fire Red (Red) Orange Deep Red Bright Red Iron Red Sky Blue Pthalo/Cerulean Spectrum Red Prussian Blue Navy Blue Ultramarine Blue Green-Shade Blue **Emerald Green Turquois** Grass Green Pthalo Green Chrome Oxide Green Bright Green Dark Green Forest Green Earth Umber Burnt Umber Raw Umber Leather Lake Magenta Purple

For your convenience, we have included a generalized scenic color chart. By generalized, we mean these color representation are not accurate due to the restrictions of the four color printing process. We opted not to show color by manufacturer. There will be slight variations in each manufacturer's colors, but for the most part, these colors will be close. We did not show white or black because these should be well known. Besides if you don't know white or black, this chart will be too confusing anyway! Sincerely The Folks @ Mutual Happy Painting!

Raw Sienna

Van Dyke Brown

Yellow Ochre

Burnt Sienna

**Battleship Gray** 

# Paints =

## Flo Paint

- For stage, television, movies, display, and interior design
- Can be tinted with poster colors or with other vinyl paints
- Super vinyl clear gives a shellac look with no mess or odor
- No mixing- stir and use
- Water clean-up saves brushes
- Consistent color matching even between batches
- The only theatrical paint recommended for exterior use

## **Tough Prime**

\*= closest to primary colors

- A unique water based primer with new and improved special adhesive properties that allow it to bond to the hard-to-prime scenic materials found in every scene shop.
- Tough Prime covers just about any surface, including PVC pipe, aluminum, foams, concrete floors and plastics, as well as wood and foam core.
- This quick drying, acrylic emulsion primer dries to a tough, durable coating which can be painted over with any paint. Tough Prime is excellent for both interior and exterior use.

## **Crystal Clear** #KR1301

- An acrylic spray coating goes on clear, stays clear
- Protects wood, metal, plastic, ceramic, fabric and paper surfaces permanently

# **U.V. Crystal Clear** #KR1305

• Protects against damaging U.V. lights rays.

# **Matte Finish**

## #KR1311

- Produces a permanent, non-gloss finish that eliminates glossy sheen and light reflection on black and white or color surfaces.
- · Creates a soft satin finish.

## **Dulling Spray** #KR1310

- For a temporary, dull finish, Krylon Dulling Spray coats evenly and effectively, reducing shine on items to be photographed or videotaped
- · Simplifies lighting arrangements, wipes off easy

- Prevents smudging
- · Erase through the coating to rework

# Glitter, Paper & Dye

- Used for painting or dyeing draperies, muslin, canvas, and permanent drops and scrims
- Can also be used to mix with scenic paint and whiting
- To prevent spreading of the dye when painting, thicken it with Methocel, Gelatin Glue, Dextrine or Starch
- Wear protective gloves to protect skin this will dye skin better than fabric and it is difficult to remove from skin
- We recommend wearing a mask or respirator when handling dye

# Molding Compounds & Tools

# **Sculpt or Coat®**

- A thick white cream that is easy to spread, comb, dab, pat, sponge, brush, or smooth on with your hands
- Allows fabric to be molded and sculpted to near rigid forms
- By combining materials with Sculpt or Coat, you can create an infinite variety of mediums
- If applied thin, coating is clear;
   if applied thick, coating is translucent
- Non-toxic; safe enough to use with children

Cat #	Quantity
MCSCQ	Quart
MCSC1	1 Gallon Pail
MCSC5	5 Gallon Pail

## **Plastic Varnish**

- A non-toxic, easy to use, plastic liquid
- Gives objects a tough glossy finish
- Dries in minutes

Cat #	Description	Quantity
MCPVF1	Plastic Varnish - Flat	1 Gallon Pail
MCPVF5	Plastic Varnish - Flat	5 Gallon Pail
MCPVG1	Plastic Varnish - Gloss	1 Gallon Pail
MCPVG5	Plastic Varnish - Gloss	5 Gallon Pail

## **Solvoset**

## The New Celastic

#### #MCS30

- Compared to the old Celastic, Solvoset sticks better to itself but takes alot longer to dry
- Simply submerge the strips in Acetone and shape on any mold covered with aluminum foil
- · No release agent necessary
- Medium weight only
- Width: 57" Sheet Size: 20" x 57"

# Klean Klay

#### #MC1

- Can be used over and over with no loss of pliability
- · Natural in color
- Water soluble
- Picture shown equals 3 lbs of Klean Klay
- Sold by the pound.

# Roma Plastalene

- A non-hardening, oil-based clay
- Dark green color

Cat # Description
MC2 Soft
MC3 Firm

# Friendly Plastic

• Ideal for making precise fitting masks directly on actors' faces, as an under structure for foam latex masks, to make: armor, swords, helmets, puppets, teeth for puppets, etc.

Cat #	Description		
MCFPP28	White Pellets	1	3/4 lb. jar

## **Theatremold**

- An excellent molding clay used to make trees, rocks, columns, statues, walls, stone effects, etc.
- Molded objects are heavier than Papier Mache and dry to a hard, almost rock-like surface that can be sanded smooth and drilled.
- Takes paint very well.
- One of the easiest materials to work with. Dries quickly.

Cat #	Description
MCTM05	5 lb. bag
MCTM50	50 lb. bag

- Thermoplastics are completely safe, non-toxic, easy to use (requires hot water or a heat gun to form) fast setting, and can be reheated for reshaping and re-using.
- An open mesh thermoplastic material.
- Great for masks, costumes, special effects, crafts, substructures, amateurs, etc.
