

Camera Quick Connect Guide

STEP 1: Install Live DV from either the Apple or Android app store. Do not open it yet.

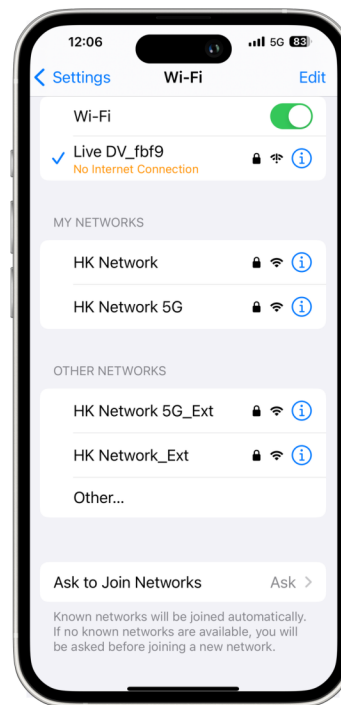

STEP 2: Turn on your camera by pressing the Mode button on the front of the camera. Turn on Wifi by pressing the Up/Wifi button on the side.

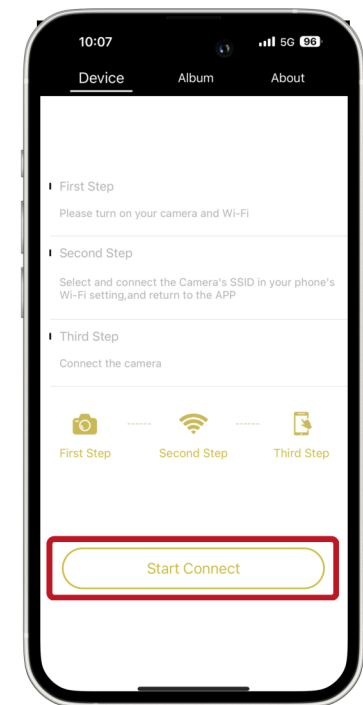

STEP 3: An orange light should now be flashing on the top of the camera and you should see SSID and PWD displayed.

STEP 4: Open the Wifi Settings on your phone. Click on the SSID that shows on the camera and enter the password (PWD).

STEP 5: It will connect to the camera and show No Internet Connection. The camera orange light should now be solid orange.

STEP 6: Open the Live DV app and click on Start Connect. You should now see the camera display on your phone. The camera screen will go black. You are now connected.
