

## Argos – Install Instructions

### Introduction

This document describes how to install the Argos software.

- Install Indusoft
- Install Microsoft SQL Express
- Download Argos
- Install Argos and Run Software

### Setup

You must have a couple items installed on your PC or the software to function properly.

#### Install Indusoft

1. Go to the Indusoft webpage and download the latest version of the software. [www.indusoft.com](http://www.indusoft.com)
2. You will need to register - <http://www.indusoft.com/Products-Downloads>

#### Install Microsoft SQL Server Express

1. Go to the Microsoft webpage and download the latest version of SQL Express.
2. You can find this at: <https://www.microsoft.com/en-us/sql-server/sql-server-editions-express>
3. Also install the SQL Management studio – it is not needed but is a good tool.
4. <https://docs.microsoft.com/en-us/sql/ssms/download-sql-server-management-studio-ssms>

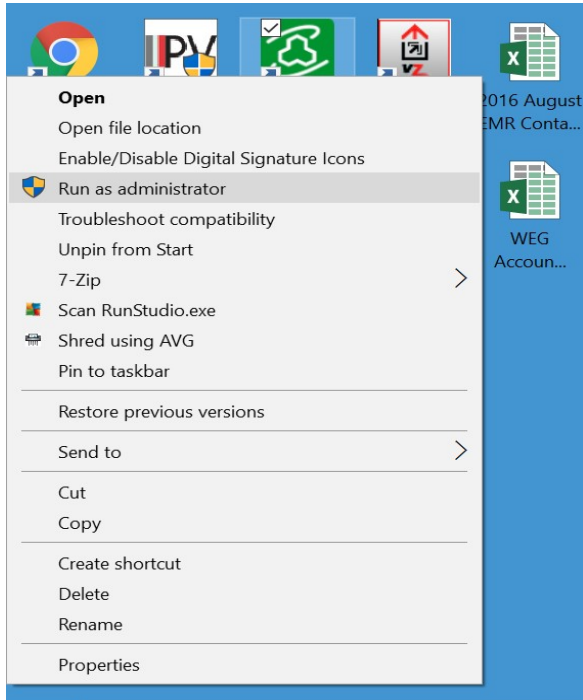

#### Download the ARGOS Software

1. Go to the Control Boss website and download the Argos software. [www.controlboss.com](http://www.controlboss.com)
2. The download is a .zip file. Extract the files. Open Indusoft as an administrator by right clicking on the Indusoft icon and selecting run as administrator.
