BUBBLER WATER Filling Instructions

Fill with cool fresh water only and **PLEASE** follow these instructions:

- Always grip BUBBLER gently but firmly, watch out slippery when wet and glass can break!
- Carefully wiggle and twist mouthpiece out of BUBBLER top
- To Fill: Turn BUBBLER upside down under lightly running cool water, it will fill quickly from bottom
- BUBBLER is self-regulating, over sink, turn right side up to drain excess water out bottom
- Water will flow through the BUBBLER filtration design
- Inhale /draw on BUBBLER top to level the water inside
- Water level will self-regulate approximately between the letters "I" and "Z" in Shatterizer, about half way
- Dry interior coil chamber and exterior of BUBBLER thoroughly
- Gently push and twist to reinsert top mouthpiece
- To Use: Load Shatterizer coil, gently twist and push BUBBLER into place

ENJOY #PerfectClouds

BUBBLER Use: Before & After

PLEASE:

- Ensure water level is perfect and BUBBLER is dry (exterior and interior coil chamber) before use
- Always use in an upright vertical position
- Keep off when not in use, while in travel and stored in case
- Empty BUBBLER of water when not in use, exhale/blow into mouthpiece to force water out bottom of BUBBLER
- Never store or travel with water filled BUBBLER, it may leak
- Fill using fresh cool water only and each and every time
- Rinse thoroughly and carefully before and after use
- Keep dry BUBBLER safe by storing and travelling in case
- Remove storage container and place battery in base for desktop mode
- Do not drop, lean on side, lay down, shake, freeze or heat
- ONLY charge battery, do not charge assembled
- Do not use if cracked, damaged, chipped or broken in anyway

Shatterizer.com/BUBBLER-FAQ

Crystal Clear BUBBLER Cleaning Instructions

Keep your BUBBLER clean and clear of residue for a perfect experience. You will need: 15 minutes, paper towel or drying cloth, cotton swabs, isopropyl alcohol, warm-hot running water (not too hot) and a sink! Grip BUBBLER gently but firmly and follow these 10 Steps:

1. Carefully twist/glide BUBBLER attachment off and twist/wiggle mouthpiece out
2. Over sink, empty BUBBLER of water, exhale/blow into top, force water out bottom
3. On slight angle over sink, cover BUBBLER top with finger, slowly pour alcohol into bottom coil chamber airflow hole
4. Keep top covered with finger, swirl alcohol in multiple directions loosening residue build up
5. Soak cotton swab in isopropyl alcohol to clean bottom coil chamber airflow hole and BUBBLER top
6. On slight angle over sink, run warm-hot water through BUBBLER bottom (upside down) allowing residue to empty from the top
7. Rinse BUBBLER thoroughly with water
8. Repeat steps 3 to 7 until BUBBLER is crystal clear
9. Dry exterior, inner coil chamber area, gently push/twist to reinsert mouthpiece
10. Wipe down travelling case with damp cloth
