

General Notes

- Please read all instructions thoroughly before starting installing this product.
- The ARB air compressor mounting bracket is intended for **ARB Twin Aircompressor CKMTA12**.
- ARB Air Compressor is NOT included.
- Mounting hardware included.
- Riv nut gun is NOT included.

MOUNTING

- Remove bracket and hardware from box.
- The ARB air compressor mount will ONLY mount under the hood on the passenger side. Before you install the bracket in the engine bay its best to cut and lower the wiring from the front raised lip. Once this is done you can align the bracket so that the two forward tabs are sitting ON TOP of the raised lip and the longer mounting leg is on the curvature of the engine bay as shown below.

RB Components / 2019+ ARB Air Compressor Mount

- With the bracket in place. Use a black pen to mark the mounting holes. The holes in the mounting bracket will not line up with any of the holes in the van. Next you will need to use a 3/8" drill bit to drill out the mounting holes for the riv nuts.
- Install all the riv nuts into the mounting holes.
- Mount the ARB compressor to the mounting bracket before installing in van and then mount the assembly into the van as shown:
