

# Installation Instructions for Lower Door Panel Stuff Bags

## General Notes

- Rear door lower stuff bags. Slip over rear door panel providing much needed extra storage
- Please read all instructions thoroughly before starting installing this product.

## Tools Needed

- Phillips tip
- Powered Screw Driver

## Installation

- 1) Start by removing the rear door panel from your van.

- 2) The rear door panel will then slide into the rear door stuff bag as shown.

3) Your bag and rear door panel should slip completely on as shown below.

4) With the stuff bag fully slipped onto the lower rear door panel you can now mount it back onto the rear door of your van. Line up the lower rear door panel on your door. Start by screwing in one of the upper corners using the self drilling screws that are provided. Once the upper screws have been installed we can secure the lower part of the panel and stuff bag.

5) Secure the middle part of the bag by securing a screw thru the steel grommet as shown.

6) The lower part of the stuff bag does not have a steel grommet. In this area we place the self drilling screw in the lower area of the bag as shown.

7) Installation is complete.

***Installation is now complete. If you have any further questions on this or any other RB Components product please feel free to reach us directly (562) 802-1200***
