"XL" Deluxe Automatic Blood Pressure Monitor

Model: **MW701** f

Cuff Detection (CD)

OK

Detects and indicates whether the cuff is wrapped around the arm properly

Movement Detection

The "Movement Detection" helps reminding the user to remain still and is indicating any body movement during measurement. The specified icon appears once a "body movement" has been detected during and after each measurement.

- Cuff Detection
- Movement Detection
- Hypertension Risk Indication
- Irregular Heartbeat Detection (IHB)
- Average of Last 3 Readings
- 7 day AM/PM Averaging
- 120 Memories for 2-users With Date and Time Indication
- Guest Mode
- Latex-Free Patented Universal Cone Cuff
- Large LCD size : 101*118 mm
- Adaptor Socket
- Lifetime Calibration
- PC Link (Optional)
- Zipper Bag

Storage and Transportation Condition
-10°C~60°C(14°F~140°F)
10%~90% RH, 700~1060 hPa

Real fuzzy Technology

Real Fuzzy Technology determines ideal cuff pressure based on one's systolic blood pressure and arm size. Users no longer need to pre-set the inflation level before measurement. The technology eliminates arm discomfort through unnecessary high inflation settings and also prevents inaccurate readings caused by erroneous cuff inflation levels.
