

LED NEON ROPE LIGHT

LED Neon rope light is the highest quality rope in the market. These Rope light is made of high quality silicone which is fully water proof and heat resistance and will maintain it's outer color for a lifetime without even fading. Rope is available in two types D and S types. D type is specially design to use around the building and S type is specially design to customize any number or character like "COKE."

- Flexible and cuttable modules marked for design freedom
- Optional aluminum profile & clips are available
- Dot-free linear neon illumination
- Fabricated with UV-resistant silicone material

LED NEON ROPE LIGHT

1100403	D TYPE - Aluminum Strip / Profile							

**Optional Wireless Bluetooth Controller
for RGB LED Neon Rope Lights
- SKU: 1010717**

LED NEON ROPE LIGHT

Features

- Flexible and cuttable modules marked at every 1.97in [50mm] for design freedom.
- Mounting clip accessories and optional 4' aluminum profile are available to increase the versatility of the system.
- Dot-free linear neon illumination.
- Fabricated with Eco-friendly, UV-resistant silicone material.

Input Voltage

- 24V DC

Advantages

- Easy to install and operate.
- Energy saving, long lifespan.
- Light is soft and uniform, safe to eyes.
- Instant start, NO flickering, NO humming.
- Green and eco-friendly without mercury.

Recommended Use

- Around Signage
- Store Windows / Building Crown
- Decor Lighting / Around Bar Table / Under Counter / Around Ceiling
- Along Walkways

LED NEON ROPE LIGHT

LED Neon rope light is the highest quality rope in the market. These Rope light is made of high quality silicone which is fully water proof and heat resistance and will maintain it's outer color for a lifetime without even fading. Rope is available in two types D and S types. D type is specially design to use around the building and S type is specially design to customize any number or character like "COKE."

- Flexible and cuttable modules marked for design freedom
- Optional aluminum profile & clips are available
- Dot-free linear neon illumination
- Fabricated with UV-resistant silicone material

LED NEON ROPE LIGHT

Features

1. High efficacy 5050 SMD
2. Min bending diameter in 30mm [1.18in]
3. Easy installation on uneven surface
4. IP67 for dust and water proof
5. Input voltage: 24V DC
6. Full color range with RGB controller

Easy Installation

By Aluminum profile or plastic clip

LED NEON ROPE LIGHT

Specifications

Model No.	Light Color	Color Temperature/ Wavelength(K/nm)	Beam Angle	Luminous Flux (Lm/m)	Efficacy (lm/W)	Current (A/m)	Voltage (DC V)	Power (W/m)
BLT-RGB-0-24V	R	620-625	120°	56	12.8	0.19	24	4.6
	G	520-525		137	21.1	0.261		6.3
	B	465-470		27	4.0	0.269		6.3
	RGB	100000		134	7.9	0.269		17.3

Parameters

Model No.	Quantity (pcs/m)	Standard Series Connection (m)	Max Run Single ended (m)	Min Cuttable Length(mm)	Working Temperature	Storage Temperature
BLT-RGB-0-24V	108	5	4	55.6	-20~+60°C	-20~+70°C

NOTE:

1. Luminous flux & power tolerance within $\pm 10\%$.
2. The RGB data here is tested with three lights on and under control.
3. Standard series connection is packaging length.
4. Max run is related to the working current, the larger the current, the shorter the length.

Note: The above data here is tested at R、G、B three lights on and under control.

LED NEON ROPE LIGHT

Packing

Label the reel;

Put reel, accessory bag and desiccant together into aluminium foil bag;

Seal and label the aluminium foil bag;

Put the packed aluminium foil bag into carton box;

Seal the carton box;

Label the box;

Use packing belt to pack. Add edge protectors if necessary.

Packaging information

Model No.	Product Size L*W*H(mm)	Carton Size(mm)	Meter/Reel	Reel/Carton	Net Weight(kg)	Gross Weight(kg)
BLT-RGB-0-24V	5000X17X10	390X390X325	5	12	10.8(1±10%)	15.5(1±10%)

Note:

Five meters for a reel and packed in a aluminium foil bag.

The above quantity and weight are only for the illustrated packaging method. There will be differences in the quantity and weight with other packaging methods.

Installation aluminum profile
(1m, Optional)

Note:

more accessories can be provided according to customer requirements

All accessories will be different depending on the product, please correspond the accessory list to the product or reference purchase code.

3.Installation steps

By self adhesive tape

Weld the wire to the PCB board

First put waterproof glue inside of the plug, then push into the tape light

Wipe off the excess glue and wait for the glue to solidify.

LED NEON ROPE LIGHT

Installation

Install with clips

First put waterproof glue inside of the plug, then push into the tape light

Wipe off the excess glue and wait for the glue to solidify.

4. Operation details of installation card

Screw the clip into the installation position

Then slowly press the tape light into the clip

The tape light is flatly and firmly stuck in the clip

5. Installation of Aluminum Track

Screw Aluminum track to the mounting surface

Put the grip plate into the groove of Aluminum track

Make strip light flatly and firmly stuck in the grip plate

6. Installation of Aluminum Track(1m)

Screw Aluminum track to the mounting surface

Put the grip plate into the groove of Aluminum track

Make strip light flatly and firmly stuck in the grip plate

LED NEON ROPE LIGHT

Installation

Note:

1. At welding part, note the positive and negative poles of lines and board and the corresponding colors on the board; positive to positive and negative to negative
2. Each connection point must use 10g silica gel, and treat waterproof and insulation well;
3. The screw of installation card must perpendicular to installation surface and be fastened, as shown in the right.

Important Notices

Cutable mark

Neat and smooth cut

Slide a spindle into the roll and then place the roll with spindle on top of the box provided.

Correct usage of products

Gently unroll the fixture without excessive force.

No cutting distort

No embossing operation

Do not twist

Do not repeatedly bending
This will damage the circuit

Do not wring

Do not bend 90°

No recessing operation

Note:

Cutting marks are on the PCB and can be seen through the tape light.

The above diagram only shows the correct or wrong way of operation. The product should be based on the actual product.

LED NEON ROPE LIGHT

Important Notices

- Before installation, check that the product parameters are consistent with the requirements (Seeing product specifications or product labels)
- Load voltage, current, power and power supply should be matched with the product.
- Follow the instructions of wiring diagram (first connect the load and then the power supply) to avoid short circuit.
- Make sure the correct connection of positive and negative poles between products and power supply. Otherwise, the light will not be on.
- Make sure the power cord firmly screwed into the terminal and it should not be pulled out by hands.
- The terminal should have insulation, waterproof and anti-corrosive treatment.

Trouble Shooting

Quick Guide		
Problems	Reasons	Solutions
All LEDs can not light on.	No electric supply.	Power on
	Automatic power protection from the open or short circuit in output of the power supply.	Fix the short circuit problem.
	Wrong connection of power supply.	
LEDs can not light on partly.	Some switching mode power supplies are not powered.	Check the power supply system to fix it.
	Power supply line error.	
	Mistaken wire connection of some of products	Correctly connection
Brightness of LED is inconsistent or insufficient.	Power overloaded.	Replace with more powerful power
	Power supply circuit excessive consumption.	Make sure the working voltage of the product within $\pm 5\%$ of standard voltage, or keep balance by circuit power consumption.
	Excessive quantities in series connection of the product	Reduce the quantities of the product in series connection to meet requirement.
LED flicker.	Connection point fault.	Remove bad connection point.
	Switching power supply failure.	Replace a new power supply.
	Wrong installation or use of products	Please follow the instructions

Warning

- Do not disassemble or retrofit the light. Do not touch the surface of the light with a sharp object.
- Do not do live-line working during installation, especially for high voltage product.
- Do not use any organic chemical solvents.
- Use neutral glass adhesive to fix this product and it needs to be dried 4 hours in the open environment after operation.
- Treat the ends and the circuit connection points that are not connected to the main line with insulation, waterproof, and anti-corrosion in the installation.
- Use 18AWG (0.75mm² cross-sectional area) or thicker core wire to avoid adverse consequences caused by overheating, if the power cable need to lengthen.
- Make sure the input voltage meets the requirements and lines are connected correctly before lighting on.
- This product is for signage, and do not use as general lighting.
- Series connection within the max run.
- The length of the power cable between the power supply and the led strip should not exceed 2 meters. Otherwise, large circuit loss will lead to inconsistent brightness.
- Installation, maintenance and repair should be operated by a qualified technician.

LED NEON ROPE LIGHT

Notices & Recycling

Statements:

Repair should be operated by a qualified technician, if the external circuit or main line of this product is damaged.
The parameters given in this manual are typical values and for reference only.
All illustrations and drawings in this manual are for reference.
This product is subject to change without notice.

Recycling:

LED lighting products belongs to electronic products, please do recycling treatment according to the relevant WEEE directives.

Application

Ideal for decorative and landscape illumination.
