

DesignYourFabric.com – Example of Yardage Test Sample

*Image Size: Width of Fabric by 36"H (1 yard)

Please note: Some examples may/may not apply to your particular design. They are only recommendations and it is not required that you create an exact copy of these examples or use all of the examples in your sample test.

To briefly summarize each example:

Example A – Incorporate multiple pattern designs on the same fabric/image file. Create small repeat patterns and patterns at different scales/sizes (optional).

Example B– Test line thicknesses, text sizes, and circle/circle outline sizes, with and without background colours. Specifically, for designs that are incorporating thin lines, text, and other small design elements.

Example C – Colour test designs. Create various colour palettes of the original colours and try to get a colour match. Highly recommend creating 5/more colour palettes for better accuracy.

Example D – Test solid colours at different intensities/densities.

Example E – Test photos with various alterations of colour, brightness, contrast, exposure, etc.
