

DESCRIPTION

The AtLite New York City-approved Steel LED Combination Exit/Emergency Rival LED Series is illuminated by a field replicable, high brightness LED strip. Extra capacity for use with remote fixtures is standard as each unit can drive 4 total LED heads. From one to three LED heads can be mounted directly to the unit and the additional capacity can be used to drive remotes up to a total of four LED heads. The emergency lighting heads are aimable, offering exceptional illumination for safe egress. The series exceeds all applicable NEC and NFPA requirements and is UL 924 listed.
