 barbican

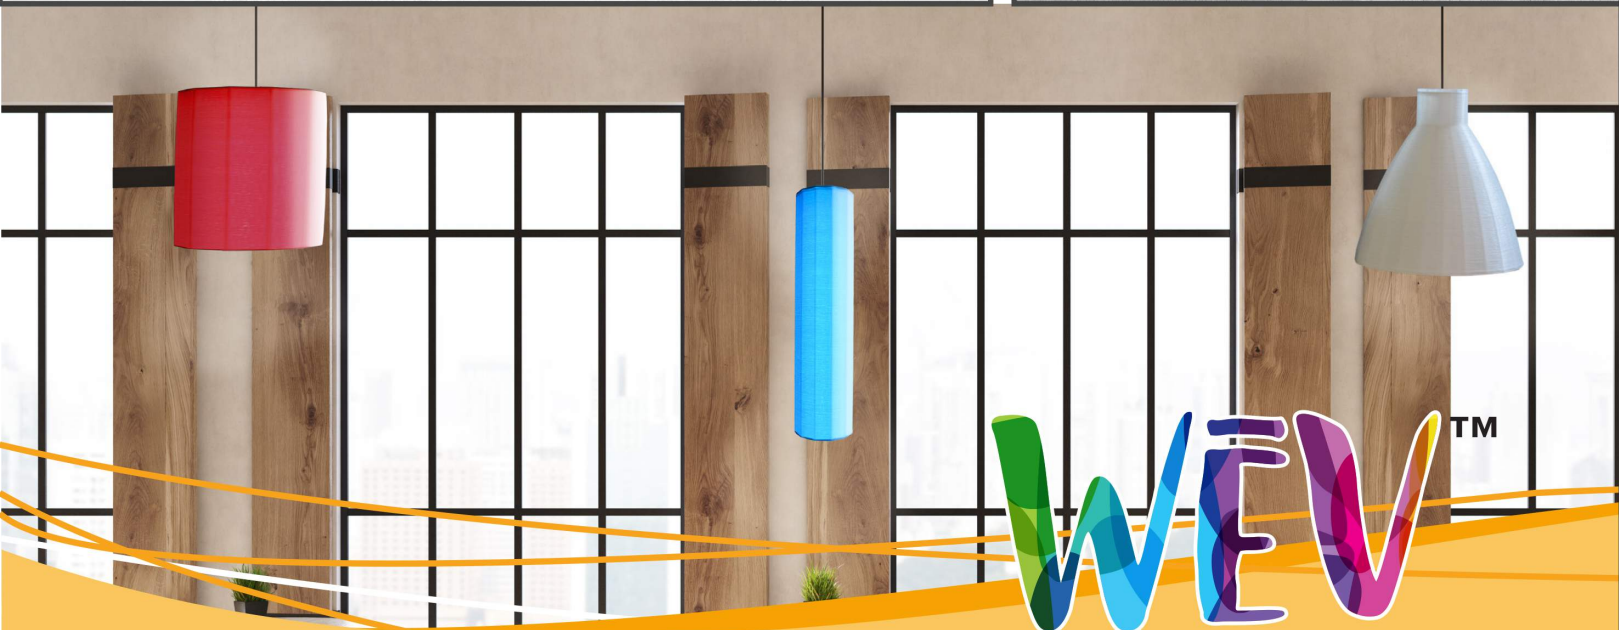

A fun and fresh collection of fiberglass fixtures.

The Collection features many shapes, sizes and colours.

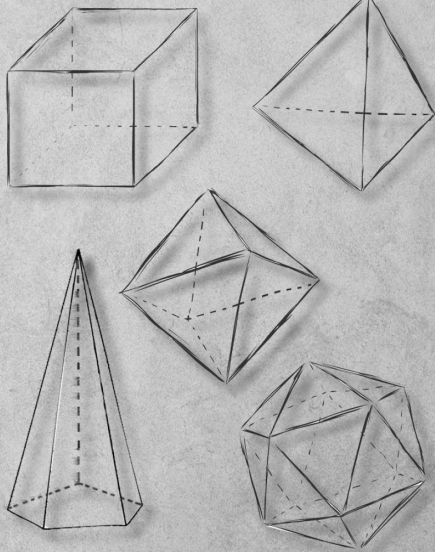

**Wēv™**

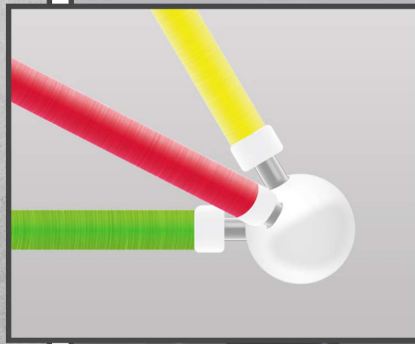

Introducing the **Wēv™**. A stunning collection of washable, woven fiberglass fixtures available in a myriad of shapes, sizes and colours.

The Wēv™ Collection, a patented and trademarked line, is Barbican's only machine-manufactured shade. This approach provides consistency both in finish and quality. As an in-house manufacturer, the tooling required for the sizes and shapes are created within our facility, allowing for easy customization. Highly durable, flexible and lightweight, many models and sizes of the Wēv™ can be suspended by only a power cord. With a palette of 20 standard colours ranging from vibrant to pastel, along with optional colour matching, the Wēv™ combines lively design styles with functionality. Lit by a six-sided extrusion, the Wēv™ offers consistent output performance throughout the fixture.

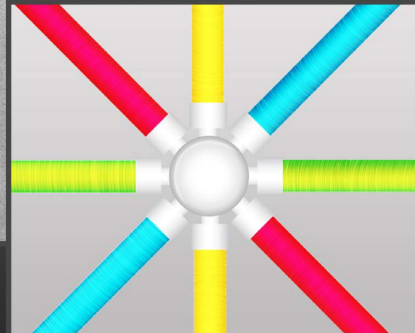

Icicles can be grouped to build geometric shapes.

Use our specialized connectors to build artistic 3-dimensional shapes or design 2D 'mesh' structures along ceilings and walls.

Wēv Icicles shown in diamond formation

Discover the **ICICLE**. A sliver of pure dazzling light, the Icicle is a brilliant 1" diameter glass tube wrapped in fiberglass strands. In its classic white form, it is a high output fixture and is able to provide enough light to be the primary source in a space. Use colour and other embellishments for more decorative applications.

Part of the Wēv™ Collection, the Icicle uses 3D printing techniques which provides consistency both in finish and quality. As a lightweight pendant, the Icicle can be suspended by only a power cord for most lengths, which range from 4" - 60". With a palette of 20 standard colours varying from vibrant to pastel, along with optional colour matching, the Wēv™ Icicle allows the brilliance of ice to sparkle in any shade. Design artistic or geometric configurations using specialized connectors, or create clusters in different lengths to form a unique focal point. As a washable fixture, it's perfect for retail and hospitality environments.

The Wēv™ Collection can offer low-cost solutions, visit [www.barbican.ca](http://www.barbican.ca) for more information.
