

IMPORTANT SAFETY INSTRUCTIONS:

- Please read carefully before installing. Save these instructions.
- Consult with a qualified electrical contractor and local electrical codes before installing any electrical product.
- Clean fixture with mild soap. Do not use acid or any other solvent base cleaner.
- Do not submerge fixture in water.
- All fixtures must be installed 10 feet (3.05m) away from a pool, spa or fountain.
- Use fixture with low-voltage outdoor lighting system only.

WARNING: INSTRUCTION PERTAINING DO NOT OVERLOAD LOW VOLTAGE CABLE or TRANSFORMER

ASSEMBLY INSTRUCTIONS: Refer to the drawing.

INSTALLATION/MOUNTING INSTRUCTIONS:

Note: We recommend, when installing any low Voltage fixture, that you have the following: **Voltage Meter, Wire Nuts, Amp Probe, Basic Hand Tools for Adjustment.**

INSTALLATION/MOUNTING & WIRING STEPS:

1. To prevent electrical shock, disconnect transformer from electrical supply before service.
2. Place the sleeve in pre-dug hole .
3. Run wire lead to the desired connection point with the main wire lead running to the transformer, cut the excessive wire at the fixture.
4. Connect fixture wire lead to main wire lead from the transformer using desired wire connection suitable for underground burial or wet location.
5. Power supply cable for connection to this fixture should be SPT-3 underground low energy cable and listed as such.

WARNING: INSTRUCTION PERTAINING TO A RISK OF FIRE, OR INJURY TO PERSONS:

- Light fixture is HOT. Light fixture is hot when illuminated: do not touch when the fixture is ON.
- Turn off/unplug electrical power before modifying the lighting system.
- Allow fixture to cool before touching.
- Do not touch hot lens, guard, or enclosure.
- Keep away from potential flammable materials, structure, and/ or landscapes.
