LED Product Selection Guide  
Q1 2022

- Lumark
- McGraw-Edison
- Invue
- Lumiere
- Streetworks

# Delivering unparalleled performance

No matter the complexity of your project, we offer a range of LED products that lower operating costs, reduce energy consumption, and enhance outdoor spaces. Whether you're looking for simple dusk-to-dawn security lighting or cutting-edge functionality, you'll find unmatched quality and attention to detail.

In other words, these products don't just meet standards. They set the standards.

The product selection guides are simple yet powerful tools to help assist with product comparison and selection based on features, performance and value.

## INVUE

» Premium quality luminaires that integrate elegantly into modern day architecture providing stunning beauty by day and visually pleasing light by night.

## MCGRAW-EDISON

» Continuing the legacy of Max McGraw and Thomas Edison, McGraw-Edison sets industry standards for optimized configurations and optical precision to meet the most challenging design specifications for outdoor lighting professionals.

## LUMARK

» Lumark combines value-engineered, specification-grade lighting features with market-leading retrofit solutions to enable contractors to get on and off the job quickly and deliver superior illumination coverage.

## LUMIERE

» Lumiere provides beautiful, precision designed landscape and interior lighting to accentuate architectural design features, creating elegant and distinctive spaces.

## STREETWORKS

» At Streetworks, we empower our utility and infrastructure customers with customizable, robust, and serviceable outdoor lighting products engineered to meet any specification.

## Floodlighting

Cooper Lighting Solutions offers the widest variety of outdoor floodlighting products in the industry, ideal for applications from commercial buildings to rail yards and everything between. Available in multiple optical distributions, control options, voltages and finishes, Cooper Lighting Solutions carries a floodlighting solution appropriate for any application or budget.

# Distinctive Environmental Lighting

Lumière brings cutting-edge, feature packed accent lighting that will dramatically showcase any architectural feature, inside or out.

## Landscape

Fine-tune your lights to create dramatic lighting effects.

## Architectural

Add beauty, character and focus to modern or traditional structures.

## Pathway & Signs

Redefining the nature of architectural outdoor lighting.

# Lighting controls

Lighting the way for connected communities. Smart, connected technologies mean safer, more efficient communities – and it starts with connected lighting. Our solutions put full system control and optimization at your fingertips, helping you rise to the challenges of today and tomorrow.

The product selection guides are simple yet powerful tools to help assist with product comparison and selection based on features, performance and value.

\*WAC=Wireless Area Controller gateway

### WaveLinx Outdoor Lighting Control Module

The WaveLinx Outdoor Lighting Control (WOLC) Module extends the WaveLinx System's controls capability to a building's surroundings or site such as parking lots and short pathways. The WOLC Module is individually addressable and installs on top of a light pole via an ANSI 136.41-compliant, 7-pin twist-lock connector.

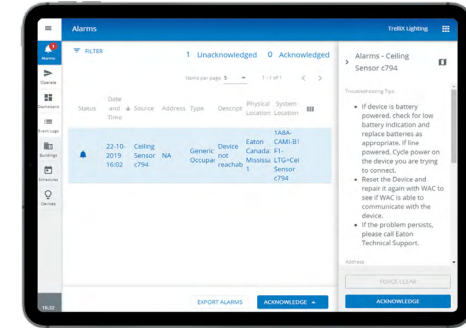

### WaveLinx Lite

The outdoor sensors offer passive infrared (PIR) occupancy and a photocell for daylight sensing for installation heights up to 40 feet. The sensor operates on Bluetooth® 4.2 mesh network and offer simple tool-less integration into WaveLinx Lite outdoor light fixtures equipped with the 4-pin Zhaga Book 18 compliant socket. The mobile application allows you to map the sensor to any area or control zone, select occupancy or vacancy, occupied and unoccupied light levels and set the hold time.

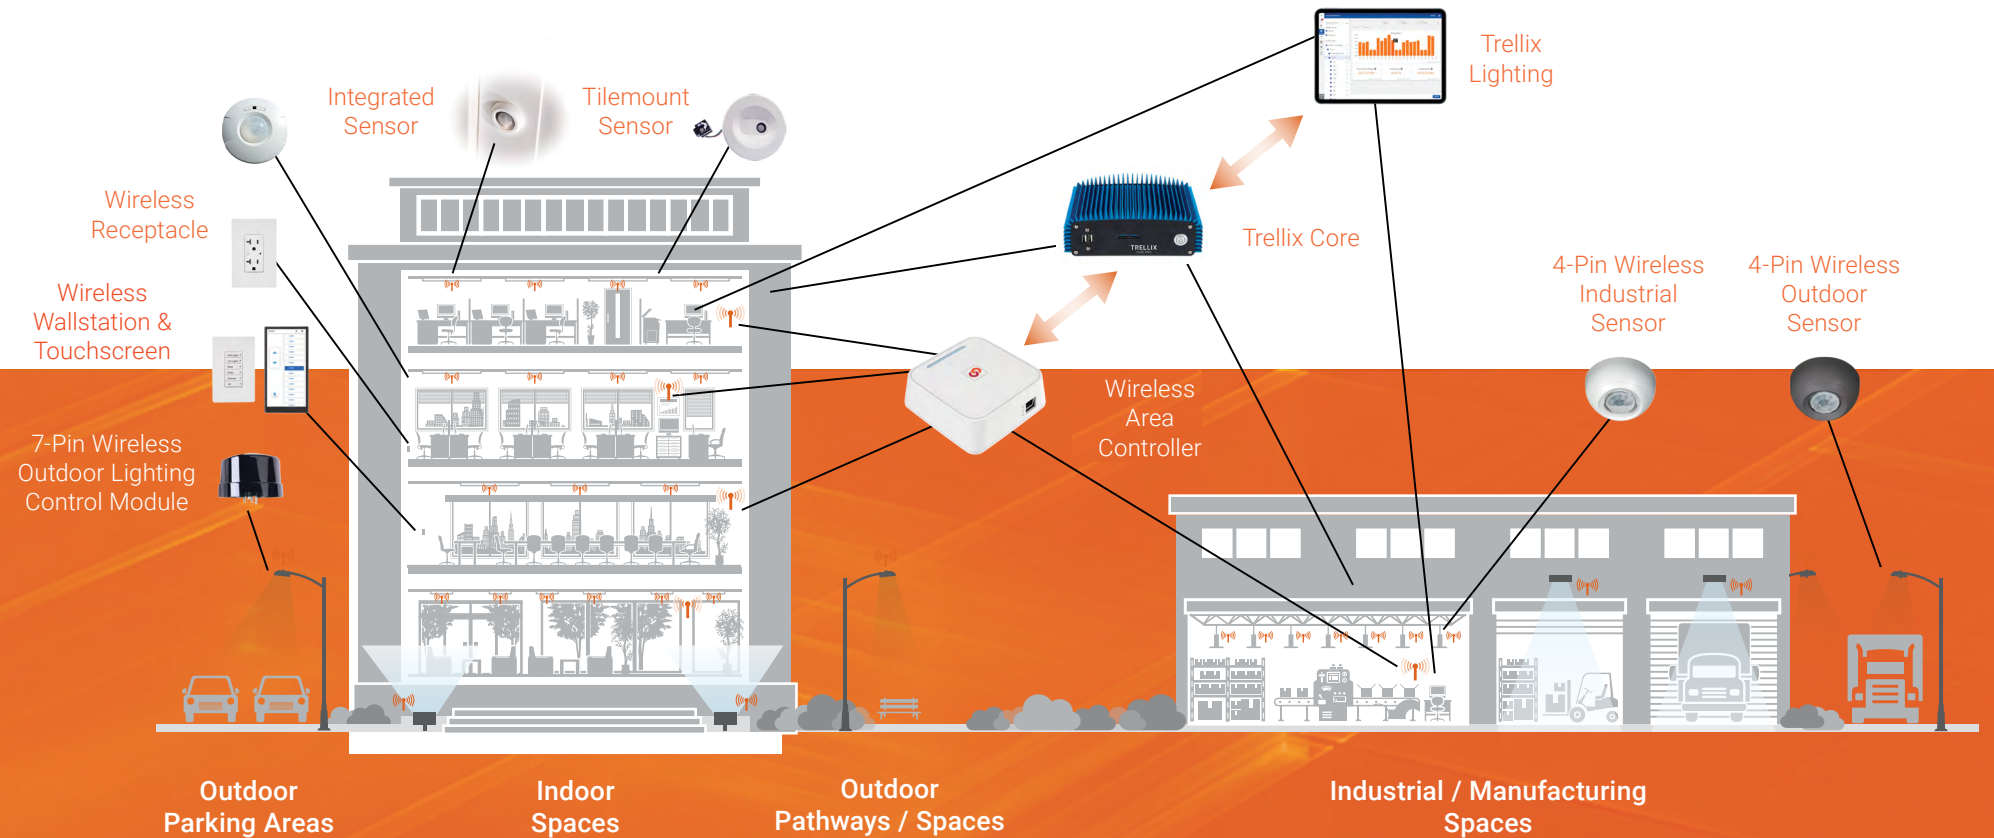

### WaveLinx Pro

Create a smart building ecosystem with convenient, out-of-the-box functionality. The Wireless Area Controller is the main component of the WaveLinx Pro wireless connected lighting system, coordinating between the WaveLinx Pro mobile app and your WaveLinx Pro enabled fixtures and devices. It's remarkably simple to set up and program (without the need for an IT network). Patent-pending code commissioning features also reduce commissioning times by 40%.

\*Shown with Trellix

### All-in-one lighting & surveillance solution This changes everything

Lighting can provide the backbone for safer communities and cities through smarter surveillance and enhanced data. Cooper Lighting Solutions's camera-integrated luminaires are an easy win for you and your customers.

#### \$ 30% Lower install cost

Reduce install cost by up to 30%.

#### Flexible integration

LumenSafe is compatible with virtually any video management system or security platform.

#### Remote monitoring

Protect valuable goods and inventory from theft or vandalism remotely. Axis Communications cameras provide users with crystal clear high-quality images.

#### All-in-one solution

Easy installation with our all-in-one LumenSafe solution. Integrated camera and networking equipment means no additional wiring is needed beyond providing line power to the luminaire.

### Take the guesswork out of the equation, for faster order processing and an all-around smooth process

We're among the select few American lighting companies who manufacture poles in-house. This allows for superior quality control and expertly-tailored end products that meet market needs. Our online pole configurator tool can help you select the poles that are right for your project.
