Bridge - BRG

Fully Uniform
WaveStream™ LED
1' x 4' Recessed, 3-3/4" Depth

Typical Applications

- Commerical Office Spaces • Schools • Hospitals • Retail Merchandising Areas

Product Features

Top Product Features

- A traditional yet modern design with the latest in solid-state lighting technology
- Leverages our patented WaveStream Technology with AccuAim™ optics
- Optimal illumination in a ultra-minimalistic shallow recessed fixture
- Customize the luminaire aesthetic with three optional shielding inlays
- Integrated sensor systems - occupancy, daylight and IoT connectivity
- Options to meet Buy American and other domestic preference requirements

Notes	Notes (3) "T1" ceiling type is compatible with Metalux DF Series Drywall Frame Kits and Metalux Universal Surface Mount Kits, ordered separately from Metalux. For 1x4 drywall frame kit, order part #DF-14-W. For 1x4 surface mount kit, order part #SK-14-WT. Refer to the surface mount kit specification sheet for more information.	Notes (5) 1x4: STP driver not available in Light Levels 1 and 2. (6) 1x4: Two HCD drivers required for Light Level 5. (7) 1x4: Two SLTHD drivers required for Light Level 5. (8) 1x4: Two STP drivers required for Light Level 5.	Notes Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinX system pages for additional details and compatibility. (B) WaveLinX Lite devices are not currently compatible with the WaveLinX Wireless Area Controller. Consult WaveLinX Lite system pages for additional details and compatibility. (C) Consult DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.	Notes (12) Integral emergency battery pack is 14W maximum, 90 minute output. A test switch/indicator button can be tested safely from the ground using a laser pointer, while the patented EZ Key prevents accidental discharge of the battery during construction. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 14=1400 lumens). Emergency battery pack not available with two driver configurations. (13) Used to transfer fixture to secondary power source for life-safety operation. When used with a dimming fixture, two devices are required to ensure control is disabled while operating under emergency power. Product height with transfer device is 5" (126mm).	Notes (14) Chicago plenum not available with GTD.

Product Specifications

Construction

- Shallow 3-3/4" deep housing is a 22 gauge steel
- Injection molded high-reflectance polycarbonate end plates securely attached
- WaveStream light engine with extruded aluminum heatsinks span across the bottom of the luminaire
- Drivers can be accessed via plenum
- Large access plate for supply connection

Optics

- Optical grade acrylic embedded with patented WaveStream Accu-Aim™ optics
- Optimal distribution, excellent uniformity, and high performance
- Center light engine becomes virtually clear in the off-state

Shielding

- Perf pattern and nano-prismatic inlays are available
- Perf inlay available in round or rectangular pattern
- Nano-prismatic inlay is a high light transmission material offering additional brightness mitigation

Finish

- Fixture housing and back reflector are high reflectance white

- Electrostatically applied polyester powder coat paint for durability and luminous uniformity

LED and Light Engine

- LED's are available in 3000K, 3500K, 4000K
- Long-life LED system coupled with electrical driver to deliver optimal performance
- Projected life is 100,000 at 74% lumen output
- Typical CRI ≥ 85

Integrated Controls

- 0-10V dimming to 1% standard
- WaveLinX wireless sensor compatible for standalone, controlled, connected, and IoT capability
- SVPD sensor compatible for standalone functionality
- Low-voltage sensor and driver compatible for DLVP applications
- DALI 2.0, Lutron, and step-dimming available

Mounting

- Universal flange design works with most lay-in ceiling types
- Integral pry-out tabs secure luminaire to ceiling grid from above

- Fixture offers tie-in locations for tie-wire on all corners
- Consult local code for appropriate tie-wire recommendations
- See Technical Notes section for drywall frame kit and surface mount kit options

Weight

- 14.0 lbs.

Compliance

- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life per TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

Warranty

- Five year warranty standard. Optional ten year warranty available.

The Bridge BRG with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The Bridge BRG delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinx Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed. When more connectivity is required, the WaveLinx Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinx Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.
