CAST Photocells (CTPC, E1CTPC, CTRPC)

CAST Photocells - Day/Night Sensored for automatic ON/OFF

Description:

When a CAST Photocell is plugged into your transformer it will turn on at dusk and it will turn off at day break. By the addition of a time clock this on/off cycle can be modified, so your lights will always turn on at dusk and turn off at a desired time at night, like 11:00PM. The CTRPC comes with a 15 foot lead wire, for remote mounting when your transformer is installed where it is not exposed to naturally daylight.

Features:

- Quick-connect to transformer photo cell plug
- Locking ring and nut secures unit to knock out opening on transformer
- Adjustable knuckle for aiming
- 1/2" stem
- Lead wire: CTPC - 7 inches, CTRPC - 15 feet
- The CTRPC includes stainless steel mounting bracket and screws

Also available in 220/240V: E1CTPC
