

Gardco SoftView LED parking garage luminaires feature edge lit technology, providing visual comfort with minimal glare to enhance the user experience. An added uplight feature reduces the cave effect for an increased sense of security. SoftView features multiple optical distributions, lumen packages and mounting options providing you with the ideal solution for your garage lighting and low bay needs. Optional emergency battery backup available for path of egress lighting and is integral to the luminaire.

- T3A not available with A06, A07, A08, A09, A10 or A11 configurations due to thermal and fit restrictions.
- TRN not available with combination of both DLEA and EM options due to fit restrictions; TRN is available with each individually (either DLEA or EM).
- Choose only 1 Dimming Controls option: either DLEA or SRDR or BL20 or BLBT or WIAP.
- 0-10V dimming driver standard.
- BL20 must be combined with MW Microwave Sensor. BLBT must be combined with Sensing option L2, L3 or L7. WIAP must be combined with Sensing option LW or HW. Choose only 1: either BL20-MW or BLBT-L# or WIAP-xW.
- DLEA luminaire has 0-10V dimming wires exiting the luminaire for dimming controls by others.
- MW available with 120V, 208V, 240V, 277V, UNV or 347V only.
- Available with 120V, 208V, 240V, 277V or UNV only.
- Must specify applicable specific input voltage, not available with UNV or HVU.
- Choose either Emergency option EM or EC cold. EM only available with A01, A02, A03 or A06 and EC cold only available with A01, A02, A03, A04, A06 or A07 due to thermal restrictions. EC cold not available with DLEA or BL20-MW or BLBT-L# due to fit restrictions; EM is available with DLEA or BL20-MW or BLBT-L# (does fit).
- Must contact factory prior to ordering - these items are ETO Specials.
- Extended lead times apply. Contact factory for details.
- A09, A10, A11 each have 2 drivers therefore due to fit restrictions not available with 347V, 480V, HVU, BL20-MW, or BLBT.
- SRDR or WIAP not available with Emergency options EM or EC cold due to thermal and fit restrictions.
- ER100 suitable for use in 40C ambient with A01, A02, A03, A04, A06 or A07 (72W max.); suitable for use in 35C ambient with A05 or A08 (90W max.); not available above 90W; no A09, A10 or A11. ER100 must be installed in conjunction with a UL 1008 device (such as a transfer switch at the electrical panel) and only for use with Wireless Interact dimming sensor (WIAP-xW). ER100 is 120V-277V. For Pi Detection with TRN Trunnion - ETO Special, must be wired at factory.
- When ordering SRDR, controller (by others) to be plugged into socket must be SR compatible (see Specifications for more details). Consult factory for lead time.

SVPG SoftView

Garage & canopy luminaire

Accessories* (ordered separately, field installed)

ES	External House Side Shield (designed for use with Type 3, reduces light output by approx. 15% on average)	SVPG-G2-TM-(F)	Trunnion Mount kit (can ONLY use when TRN Trunnion Mount product is ordered)	BXC	Bird excluding coil (fits on all mounting options) (negligible upright impact)
WG	Wire Guard	SVPG-G2-WM-(F)	Wall Mount kit (can ONLY use when WAL Wall Mount product is ordered)	BXK	Bird excluding spikes (fits on Pendant, Trunnion, and Wall mounts only) (negligible upright impact)
IRT9015	Handheld remote for grouping and configuration of Wireless Interact WIAP (at least 1 required per site or use the Interact Pro App).			BXS	Bird excluding shroud (fits on Pendant mount only) (negligible upright impact)

(F) = specify finish

* Consult Signify to confirm whether specific accessories are BAA-compliant.

Emergency mode

Ordering Code	Approximate average lumen output*
SVPG-A01 or A02 or A03, EM	2,400
SVPG-A01 or A02 or A03 or A04, EC cold rated	2,900
SVPG-A06, EM	2,600
SVPG-A06 or A07, EC cold rated	3,200

Values from photometric tests performed in accordance with IESNA LM-79 and are representative of the configurations shown. Actual performance may vary due to installation and environmental variables, LED and driver tolerances, and field measurement considerations. It is highly recommended to confirm performance with a photometric layout.

NOTE: Some data may be scaled based on tests of similar (but not identical) luminaires. Contact factory for configurations not shown.

* For emergency EM and EC options, published values are based on approximate averages across all CCTs and all distributions assuming 15 foot mounting height. It is highly recommended to confirm with a photometric layout that emergency performance meets your applicable ordinances.

SVPG SoftView

Garage & canopy luminaire

Specifications

Construction

Lower housing made of low copper die cast Aluminum alloy for high resistance to corrosion. Upper polycarbonate lens provides uplight, tapered shape of upper housing deters dirt accumulation, eases cleaning frequency, and deters birds from sitting or nesting. UV-resistant acrylic lower lens.

IP Rating

IP66 rated luminaire with seal around entire perimeter of the lens. All electrical components within entire perimeter of lens, also within IP66 seal. Includes breather element that equalizes pressure between luminaire interior and exterior environment and maintains it over time to prevent water entry and premature gasket failure.

IK Rating

IK10 high impact resistance rating for both the upper lens and the lower lens.

LED Thermal management

The luminaire design provides excellent thermal management critical to long LED, driver and system life. Natural convection air flow, product does not use any cooling device with moving parts (only passive cooling).

Light engine

Composed of mid power LEDs, uniformly spaced around entire perimeter of lens (symmetric distributions). Color temperatures per ANSI/NEMA bin Warm White 3000K nominal (3045 +/-175K) 80CRI, Neutral White 4000K nominal (3985 +/- 275K) 80CRI, or Cool White 5000K nominal (5029 +/- 283K) 70CRI (80CRI available - must contact factory prior to ordering, this is an ETO Special). LEDs tested by ISO 17025 accredited lab in accordance with IESNA LM-80 guidelines, extrapolations in accordance with IESNA TM-21.

Optical system

Light guide plate composed of high performance optical grade PMMA (polymethyl methacrylate) acrylic. Edge-lit light guide technology allows for optimal light distribution without direct view of the LEDs, providing low-glare, uniform horizontal and vertical illumination with optimum visual comfort. Type 1R Rectangular, Type 3 Asymmetric, Type 5 Symmetrical and Concentrated Downlight (5CD) distributions available, designed for compliance to IES RP-8. Consider Type 1R for one luminaire per bay applications, ramps, and drive lanes leading up to or exiting parking stall decks; Type 3 for wall mount applications and perimeter mounted luminaires to throw light into parking garage away from property line (LEED compliance, property cut-off, avoid light trespass); Type 5 for general use in parking bays; Concentrated Downlight and/or higher lumen configurations when enhanced lighting is required for entries and exits, ramps, payment areas, lobbies and waiting areas, etc. and for security lighting per IES G-1. Uplight (up to 3%) provided with Type 1R, Type 3 and Type 5 to eliminate cave effect; for these distributions almost no uplight (<1%) available - must contact factory prior to ordering, this is an ETO Special. Almost no uplight (<1%) provided standard with Type 5CD. More uplight available - must contact factory prior to ordering, this is an ETO Special. Performance tested per LM-63, LM-79 and TM-15 (IESNA) certifying its photometric performance.

Electrical

Constant current electronic driver. High power factor (0.9 minimum). 50/60 Hz. Low THD (20% maximum). Open/short circuit protection and voltage overload protection, automatic recovery after correction. Driver comes standard with 6KV on-board surge protection. Dimming driver standard. 0-10V dimming to minimum 10% power. RoHS compliant. Driver enables setting LED drive current to meet your specific total wattage consumption, lumen output and/or efficacy needs - ETO Specials, contact factory.

Surge protector standard and tested in accordance with ANSI/IEEE C62.45 per ANSI/IEEE C62.41.2 Scenario I Category C High Exposure 10KV/10KA waveforms for Line-Ground, Line-Neutral and Neutral-Ground. Optional enhanced surge protector 20KV/10KA also available. Surge protector wired in parallel so that if it fails open the luminaire will remain lit/powerd on. When Emergency options EM or EC are chosen, two surge protectors provided for complete protection - one for unswitched hot line, one for switched hot line.

Due to the inrush current that occurs with electronic drivers, recommend using a time delay or slow blow fuse to avoid unnecessary and unwanted fuse blowing that can occur with fast acting fuses.

Mounting

SUR: Surface mount for Normal vibration rating. Stamped anodized aluminum upper housing with a die formed 16 ga. galvanized steel EZ-hang plate supplied for mounting to a recessed or surface-mounted 4" (10.16 cm) junction box (by others) - flush ceiling mount to a recessed junction box, or direct mount to a surface-mounted junction box. Integral hanger tabs on the plate support the luminaire during wiring. Single screw secures luminaire for quick and easy installation. Includes minimum 12" (30.48cm) wires that pass through IP66 rated grommet which seals around the wires. For indirect pendant mounting with Normal vibration rating, order Surface Mount (SUR) and mount to a wet location junction box (by others) which you then direct mount onto rigid pendant (by others).

SBO: Surface mount for higher Bridge / Overpass vibration rating. Die-cast aluminum upper housing with a supplied die formed 16 ga. galvanized steel EZ-hang plate with integral strengthening feet. Plate supplied for mounting to junction box (by others), integral hanger tabs on plate support luminaire during wiring. Single screw secures luminaire for quick and easy installation. Includes minimum 12" (30.48 cm) wires that pass through IP66 rated grommet which seals around the wires.

PEN: Direct pendant mount for higher Bridge / Overpass vibration rating. Die-cast aluminum upper housing includes integral 3/4" NPT tapped hole for direct mounting onto rigid 3/4" pendant (by others). Includes minimum 38" (96.52 cm) wires that pass through IP66 rated grommet which seals around the wires.

TRN: Mounts to a concrete ceiling with an anodized aluminum trunnion bracket assembly (order separate line item accessory, painted to match luminaire finish). Includes minimum 36" (91.44 cm) SEOW cord exiting luminaire through IP66 cord seal. The assembly permits (8) one inch (2.54 cm) incremental mounting height adjustments, ranging from 13 to 21 inches (33.02 to 53.34 cm).

WAL: Anchors directly on a wall with wall bracket assembly (order separate line item accessory, painted to match luminaire finish), includes minimum 12" (30.48cm) wires that pass through IP66 rated grommet which seals around the wires.

Control Options

Note: other controls can be integrated as ETO Specials - contact factory.

DLEA: 0-10V dimming driver with dimming wires externally accessible for connecting dimming controls by others.

BLBT: Motion Response luminaires include a WattStopper passive infrared (PIR) motion sensor, standby power is 0.5 watts. Factory pre-programmed standard settings include a dimming level down to 20% and time delay of 10 minutes with no stand-by period. This means when no motion is detected for 10 minutes the sensor will dim the luminaire down to 20% of total lumen output. When motion is detected the luminaire returns to 100% full light output and will remain on full power for 10 minutes default prior to dimming back to low when no motion is detected. Other dimming levels, holding times and stand-by periods are possible by re-programming in the field via Bluetooth® using the WattStopper sensor configuration mobile app (available in iOS® or Android®); programming is also factory customizable - ETO Specials, contact factory.

Motion Response includes light sensor feature called **Photocell On/Off** which is disabled by default. This feature can be enabled in the field using the same WattStopper sensor configuration mobile app - this allows for daylight harvesting supported through dimming. Motion sensor includes reading/measuring feature called **Sensor Level** that can be used to establish a baseline for daylight harvesting. See WattStopper sensor configuration mobile app User Guide for details (contact WattStopper for programming help as required).

Garage & canopy luminaire

Specifications

Controls Options

BL20-MW: Motion response luminaires include a high frequency microwave sensor, 5.8GHz+/- 75MHz microwave ISM continuous wave band with 360° coverage area, <0.5 mW transmitting power and <1 W standby power. Microwave motion sensor designed to detect motion through the lower lens so it is hidden inside the luminaire without any protruding components. Sensor allows energy savings and meeting code requirements without compromising comfort and aesthetics. Factory pre-programmed standard settings include a dimming level down to 20% and time delay of 3 minutes with no stand-by period. This means when no motion is detected for 3 minutes the sensor will dim the luminaire down to 20% of total lumen output. When motion is detected the luminaire returns to 100% full light output and will remain on full power for 3 minutes default prior to dimming back to low when no motion is detected. Other dimming levels, holding times and stand-by periods are possible – ETO Specials, contact factory. Microwave sensor's photocell is disabled since the sensor is embedded inside the luminaire (therefore daylight harvesting is not possible).

Sensor Ready SR Driver and Zhaga Socket (SRDR): Product equipped with Sensor Ready driver(s) connected to 4-pin Zhaga Book 18 compliant receptacle designed for sensor and other control system applications. Receptacle is rated IP66 assembly in a compact design that provides a sealed electrical interface and rated UV resistance, mounted on underside of the luminaire, protective dust cap included. When a controller not provided by Signify is used with Sensor Ready Zhaga socket connector, the controller must be certified to work with the Xitanium SR LED drivers as part of the SR certified program.

WIAP with LW or HW sensor: Scalable connected sensor with integral occupancy and daylight sensing, supports wireless mesh connectivity. Sensor works in the Foundation mode when configured without a gateway or in an Interact Advanced mode if a compatible gateway (can be added later) is used. Interact offers an App, a portal and a broad portfolio of Interact-ready Indoor and Outdoor luminaires, lamps and retrofit kits all working on the same system. Startup is implemented via Interact Pro App (available in iOS® or Android®) and Bluetooth® connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup. Setup with the gateway requires wired Internet access to the gateway. Prepare project configuration steps remotely and use IRT9015 remote accessory (ordered separately) or the App on-site to identify and group devices together. WIAP includes SR driver and SR receptacle. Daylight harvesting supported through dimming – activated via the Interact App. Sensors IP66 rated.

Compatible with the following (ordered separately):

- Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
- Battery powered IP65 presence & daylight sensor OCC-DLsensor IA CM IP65 WH

For more information on Interact visit:

www.interact-lighting.com/interactproscalablesystem

LW low sensor

HW high sensor

Note: The beam patterns shown are intended solely as a general guide and are not to scale. Sensing capabilities and coverage area depend on many factors including the size, speed and direction of travel of persons and vehicles; sensor mounting height; environmental and site conditions; etc.

ER100 (use with WIAP only): Optional internal emergency relay. When normal AC power is lost, relay bypasses WIAP wireless dimming sensor and forces luminaire to full light output.

Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output.

Power Interruption Detection (Field option*) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output, consult your local authority for UL924 applicability. *NOTE: For ER100 Power Interruption Detection when TRN Trunnion is also ordered – must contact factory prior to ordering, ETO Special that must be wired at the factory.

For more information on ER100 visit:

Emergency battery backup

Optional internal emergency battery pack immediately detects normal AC power loss then provides emergency light output for a minimum of 90 minutes when power is lost compliant with UL 924/CSA22.2 No. 141 and NFPA 101 Life Safety Code path of egress requirements. Integral so there is a consistent look between emergency and non-emergency luminaires, separate accessory box is not required. **EM** suitable for use in ambient temperature conditions from 0°C (+32°F) to +40°C (+104°F). **EC** suitable for use in ambient temperatures from -20°C (-4°F) to +40°C (+104°F). **EM** and **EC** are not available for use with **347V**, **480V** or **HVU**. **EM** and **EC** always include surge protection for both the switched and unswitched lines to ensure complete protection.

Garage & canopy luminaire

Specifications

Finish

Each standard color luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish on lower housing.

Standard textured finishes include: **BZ** – Bronze Textured, **WH** – White Textured, **MG** – Medium Gray Textured. Consult factory for specs on optional (**OC**) or custom (**SC**) colors. The finish achieves a minimum scribe rating of 7 per ASTM D1654 after a minimum of 1500 hours salt spray in accordance with testing performed per ASTM B117 standard.

Hardware and Seals

All exposed screws shall be stainless steel and/or corrosion resistant and captive. All seals and sealing devices are made and/or lined with silicone and/or rubber.

LED Products Manufacturing Standard

The electronic components sensitive to electrostatic discharge (ESD) such as LEDs are assembled in compliance with EC61340-5-1 and ANSI/ESD S20.20 standards so as to eliminate ESD events that could decrease the useful life of the product.

LED Luminaire Useful Life

Refer to IES files for energy consumption and delivered lumens for each option. Based on ISTMT in situ thermal testing in accordance with UL1598 and UL8750, exclusive Signify System Reliability Tool, Advance driver data and LED manufacturer LM-80/TM-21 data, expected to reach 100,000 + hours with L70 lumen maintenance @ 25°C. Luminaire Useful Life accounts for LED lumen maintenance AND all of these additional factors including: LED color shift, LED life, driver life, PCB substrate, solder joints, on/off cycles, burning hours and corrosion.

Vibration resistance

Luminaire meets the ANSI C136.31-2018 specifications for Normal or Bridge / Overpass applications, as noted in Ordering guide on page 1 and in the Specifications text for each Mounting, tested by independent lab over 100,000 cycles in all three axes.

Certifications and Compliance

cULus Listed for Canada and U.S. to the UL 1598 and UL8750 standards, suitable for Wet Locations. Suitable for use in ambients from -40°C (-40°F) to +50°C (+122°F) up to A09, to +40°C (+104°F) for A10 and A11. The quality systems of the facility where manufactured have been registered by UL to the ISO 9001 series standards. Emergency Battery Backup options (**EM** and **EC**) are tested and listed emergency lighting devices per UL 924 and CSA 22.2 No. 141. SoftView configurations are DesignLights Consortium qualified, consult DLC QPL Qualified Products List for more details. Controls options enable compliance with Outdoor lighting energy codes including ASHRAE 90.1, California Title 24, and IECC.

Limited Warranty

5-year limited warranty. See signify.com/warranties for complete details and exclusions. **NOTE: SoftView is NOT field serviceable** due to its design - entire luminaire sealed (no separate wiring compartment). Therefore, opening luminaire affects IP66 seal and if not re-sealed properly will void warranty. Contact factory for service options.

Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions. L70 is the predicted time when LED performance depreciates to 70% of initial lumen output. Calculated per IESNA TM21-11. Published L70 hours limited to 6 times actual LED test hours

Ambient Temperature °C	Drive current	Calculated L70 Hours	L70 per TM-21	Lumen Maintenance % at 60,000 hrs
25°C	up to 3400 mA (A11)	>100,000 hours	>72,000 hours	>90%

Buy American Act of 1933 (BAA):

This product is manufactured in one of our US factories and, as of the date of this document, this product was considered a commercially available off-the-shelf (COTS) item meeting the requirements of the BAA. This BAA designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Prior to ordering, please visit www.signify.com/baa to view a current list of BAA-compliant products to confirm this product's current compliance.
