

Ordering information

PE digitally stamped pole calculations are available on Gardco Site and Area poles upon request for an additional charge.

In order to provide this service, the following information is required:

- Project name, city, and state.
- Pole catalog code.
- Fixture mounting method (i.e. D1, D2 drilling, T1, T2 tenons).
- Luminaire EPA and weight specifications.
- Additional loading EPA and weight specifications (i.e. brackets, accessories), and the height at which additional loading is being placed.
- Statement on whether the installation is at ground, or above ground. If above ground, height must be specified.
- Any design criteria or wind speed thresholds that must be followed for the project (i.e. AASHTO).

Note:

Price adder may vary depending on the project's state (i.e. California). Additional charges will occur for different designs, or design revisions.
