

# Aircraft Hangar Lighting Solutions

Tri-State Warbird Museum, Cincinnati, Ohio

Alliance High Bay Hangar Luminaire

## Highly Configurable and Energy-Efficient:

LSI's Alliance LED high bay luminaires are made in America and ideal for aircraft hangar applications. With an industry-leading output range of 12,000 to 100,000 lumens, these fixtures are among the most flexible and energy-efficient hangar lighting products in the marketplace.

## Smart Sensors and Controls:

The Alliance is compatible with LSI's Bluetooth sensor and configuration app for mobile devices. When paired with the sensor, hangar staff can easily use their smart phones to program and manage the illumination in the hangar.

## Low Maintenance and Long Lasting:

The Alliance is built to last - expected to provide illumination for approximately 20 years without maintenance. It is available in lengths of two feet and four feet, and can be mounted with a cable, hook, chain or pendant.
