

# GAME WINNING LIGHTING SOLUTIONS

*For Outdoor and Indoor Sports  
and Recreation Facilities*

# BRING OUT YOUR BEST *WITH THE BEST IN LIGHTING*

LSI offers the best in high-performance illumination for sporting facilities.

From tennis and pickleball courts to gymnasiums and recreation centers, our sport lights are everywhere you look! For more than 40 years, LSI's family of sport and court lights has been illuminating athletic venues all across the United States - including basketball courts, volleyball courts and skate parks. We offer the right lighting solutions to satisfy the player, spectator, community and environmental requirements.

Made in America and valued by facility owners, architects, engineers and contractors, each fixture in our sports family is a high-performance, energy-efficient lighting solution. These low maintenance LED products give sport facility owners more illumination options when considering the lighting requirements, architecture and size of their facilities. With solutions for both new and retrofit construction projects, our fixtures are among the most versatile, and popular, sport lights in America.

# OUTDOOR LIGHTING

Our sleek, low profile CourtBlade and ZONE™ luminaires are game changers for court lighting applications. High-performance LEDs and precise optics produce superior levels of illumination and uniformity. Compared with HID systems, these products reduce energy consumption by up to 75 percent.

Anthem, AZ

## AIRLINK BLUE

Both the CourtBlade and ZONE are compatible with LSI's AirLink Blue wireless outdoor lighting control system. This simple, highly-configurable product uses Bluetooth mesh technology to manage designated zones of illumination - helping sports venues enhance safety, reduce energy costs and comply with applicable regulations.

## POLES & BRACKETS

LSI offers a full line of steel and aluminum poles and mounting accessories to complete your lighting assembly. We apply our same high-quality standards to our outdoor mounting accessories and lighting poles in square, round and round tapered shafts. In addition, LSI offers aluminum fluted and hinged base poles. Our poles are designed and engineered for durability and protected with our oven baked DuraGrip Protection System. They are available with our DuraGrip+ Protection system for unmatched corrosion resistance and an extended warranty. Our poles are American made in our Ohio facility with industry leading lead times.

# INDOOR LIGHTING

LSI's wide selection of indoor LED sport fixtures allow you to enhance the game experience for players and spectators, as well as bolster your commitment to safety at your facility. Importantly, they also help reduce energy consumption and lower energy costs. From indirect lighting to modular fixtures and everything in between, we have the right products and experience to meet your needs.

Of special note, our ZONE indirect sport light is a high-performance solution ideally suited to provide pleasant, non-glare illumination for any space that has high ceilings and open spaces, such as indoor tennis courts, field houses and athletic training complexes.

When scalability is desired, our MHB modular luminaires can be factory-jointed with a second unit to produce outputs ranging from 12,000 to 60,000 lumens. At 160 lumens per watt, the MHB is among the most energy-efficient sport luminaires in its class. This product is also compatible with our Bluetooth sensor and configuration app for mobile devices. When paired with the sensor, you can easily use your smart phone to program your lights using the LSI app.

Visit the Sports Lighting section of our website at [www.lsicorp.com](http://www.lsicorp.com) for additional details about our indoor and outdoor family of sport lights.
