## Specifications

### Fixture

Fixture shall be cylindrical in form (straight or tapered lens as specified), and feature both a roof casting and internal housing manufactured via permanent mold tooling. The outer lens shall be one-piece, injection molded, non-yellowing acrylic, sealed top and bottom with seamless silicone gaskets to an IP66 rating. Set screws and related hardware shall be finish painted to match the fixture housing. The luminaire shall be UL listed in the U.S. and Canada.

### Optional Mini-Shade / External Rings

Offered on fixture style "C" only.

**(Mini-Shade)** A small cast aluminum louvered shade measuring 17-1/2" OD x 1-1/2" tall,

See next page

# 1710LED VILLA SERIES

LED

installed above the shade on roof style **RC**. Installed under shade on styles **RA, RB, RD & RE (External Rings)** 2 flat cast aluminum rings measuring 13" OD, installed above the shade on roof style **RC**. Installed under shade on styles **RA, RB, RD & RE**

## Fitter - Standard

Fixture shall house the driver and be provided with a heavy wall die cast aluminum fitter designed to slip-fit 3"OD (R3) or 4"OD (R4) x 3" tall tenons/poles. The fitter shall have three (3) stainless steel allen head screws to secure the connection between the fitter and tenon/pole. All external hardware shall be finish painted to match the rest of the fixture housing.

## LEDs

The luminaire shall use high output, high brightness LED's, consisting of a two piece assembly complete with Chip on Board (COB) LED component and COB holder frame. The LED's and printed circuit boards shall be 100% recyclable; they shall also be protected from moisture and corrosion by a conformal coating of 1 to 3 mils. They shall not contain lead, mercury or any other hazardous substances and shall be RoHS compliant. The LED life rating data shall be determined in accordance with IESNA LM-80. The High Performance white LED's will have a life expectancy of approximately 100,000 hours with not less than 70% of original brightness (lumen maintenance), rated at 25°C. The High Brightness, High Output LED's shall be 4000K (2700K, 3000K, 3500K or 5000K option) color temperature with a minimum of 70 CRI. Consult factory for custom color CCT. The luminaire shall have a minimum \_\_\_\_\_ (see table) delivered initial lumen rating

when operated at steady state with an average ambient temperature of 25°C (77°F).

## Optics

**(TS Optic)** The luminaire shall be provided with an individual, molded silicone refractor type optic applied to the COB (Chip On Board) LED assembly. An additional vertical diffused acrylic lens installed inside the unit allows for a high level of visual comfort. All testing shall be done in accordance with IESNA LM-79.

**(TSL & TAL Optic)** The luminaire shall be provided with an individual, large injection molded acrylic refractor type optic applied to the COB (Chip On Board) LED assembly. The optic visually spreads out size of the light source while creating a Symmetric (**TSL**) or asymmetric (**TAL**) light pattern. All testing shall be done in accordance with IESNA LM-79.

## Electronic Drivers

The LED driver shall be U.L. Recognized. It shall be securely mounted inside the fixture, for optimized performance and longevity. It shall be supplied with a quick-disconnect electrical connector on the power supply, providing easy power connections and fixture installation. It shall have overload, overheat and short circuit protection, and have a DC voltage output, constant current design, 50/60HZ. It shall be supplied with line-ground, line-neutral and neutral-ground electrical surge protection in accordance with IEEE/ANSI C62.41.2 guidelines. It shall be a high efficiency driver with a THD less than 20% and a high power factor greater than .9. It shall be dimming capable using a 0-10v signal, consult factory for more information.

## Photocontrols

**Twist-Lock Style:** The photocontrol shall be mounted externally on the fixture and pre-wired to driver. The twist lock type photocontrol is instant on with a 3-6 second turn off, and shall turn on at 1.5 footcandles with a turn-off at 2-3 footcandles. Photocontrol is 120-277 volt and warranted for 6 years.

## Wireless Controls

A 5-pin (R5) or 7-pin (R7) NEMA receptacle can be included on the unit for wireless control systems.

## Warranty

Seven-year limited warranty. See product and finish warranty guide for details.

## Finish

Refer to website for details.
