

PRESS INFORMATION

All aboard for Bridge.

Pelissier were chosen to design and produce bridge tables for new cruise liner 'Ambience'. The contract was placed via Atlantic Marine Interiors and the tables were installed in May. The tables, crafted from solid beech which was then given a special wood finish to match Atlantic's chosen palette, have fixed legs rather than the folding legs that are found on most Pelissier tables.

Made specially in our Yorkshire factory they incorporate a thick wool baize woven in Lancashire.

Ambience is not the first cruise ship to install Pelissier tables and we hope it won't be the last as bridge is a very popular feature of cruising.
