TempPro Smart Mug MS14

User Manual

Attention

Please read the following instructions carefully before using the mug to prevent any harm to your body and avoid damage to the machine!

- Do not put the mug into microwave oven or dishwasher, do not store it in the refrigerator.

- Avoid hitting or dropping the mug as it may damage the sensor, which can affect the measurement accuracy.

- The mug is waterproof and can be washed, but do not soak it in water.

- After cleaning, please ensure the mug is thoroughly dried before placing it back on the coaster.

- When filling the mug with hot water, keep it out of the reach of children.

- Do not clean the mug with steel balls, bleaching agents, or any corrosive acid-alkali solvents as it may cause the coating to peel off.

- When taking the mug and opening the lid, please be careful of hot water.

1

Product Structure

Product Parameter

Model No.	MS14
Capacity	14 oz / 415 ml
Mug Size	3.5 x 4.5 x 4.6 inches / 90 x115 x118 mm
Weight	16.4 oz / 465 g
Mug Material	SS304
Battery Capacity	2500 mAh

2

Press and hold the button for 2 seconds to start, the mug vibrates for 1 second.

Auto-off

When the mug is empty, it will automatically judge and stop working, the mug vibrates 3 times.

Manual-off

Press and hold the button for 2 seconds to stop, the mug vibrates for 1 second

3

Temperature Setting

1. Manual Setting:

When the mug is on, for every press the button, temperature rises 10°F; for every double press, temperature drops 10°F, the mug vibrates once accordingly. After 3 seconds, the mug vibrates twice then finish setting. The set temperature will be recorded.

2. Factory setting temperature: 130°F / 54°C.

B: Battery Indicator

1. Put the mug on the coaster, the mug vibrates once, the B light is flashing, indicating charging status.

Color	Charging	Power
>O<	Red light flashing	< 5%
>O<	Red light constant on	> 20%
>O<	Yellow light constant on	> 60%
>O<	Blue light constant on	> 80%
>O<	Green light constant on	> 95%

2. Compatible with most smart phone, iPad, laptop and power bank's type-C output.

3. Preferable to choose original cable and adapter for charging.

4

T1-T6: Temperature Indicator

1. While the mug is off, press the button once, B / T lights will illuminate for 2 seconds, indicating the battery power and temperature.

T1-T6	1	2	3	4	5	6
°F	100	110	120	130	140	150
°C	38	43	49	54	60	66

2. While the mug is on, the T light means:

A. When the water temperature is lower than the set temperature, the T light is flashing white, means it is heating;

B. When it reaches the set temperature, the T light is constant white, means it is in the keep-warm mode;

C. When the water temperature is higher, the T light is flashing red.

- The warming time is related to the battery using time, surrounding temperature and water capacity. It can keep warm for 60-80 minutes without cable or lid.
- It is recommended to use lid, it helps keep warm for 3-4 hours, making longer warming time and battery life.

Color Label

Different color for different person for easy identification.

5

Troubleshooting

Failure Performance	Possible Reason	Solution
Unable to start working when pressing the bottom button	① Low power ② Pressing time is too short	① Charge the mug ② Press and hold the button for 2s
Unable to automatically turn on when filled with hot water	① Low water temperature ② The temperature of the mug is too high	① Fill with 122°F / 50°C of water ② Wait for cooling down
Unable to start heating	① Low power	① Charge the mug
Unable to charge	① Adapter/cable is loose ② Adapter/cable is not original ③ Foreign objects on the charging coaster or at the bottom of mug ④ Water on the charging coaster or at the bottom of mug	① Ensure adapter/cable is securely connected ② Use original adapter/cable ③ Clean the charging coaster or the bottom of mug ④ Dry the charging coaster or the bottom of mug
The lid is unable to seal tightly	① The spout cover is closed	① Open the spout cover
