 **WARNING**

Failure to follow these warnings and the assembly instructions could result in serious injury or death.

Read all instructions before assembling crib. Keep instructions for future use.

Never use plastic shipping bags or other plastic film as mattress covers because they can cause suffocation.

Infants can suffocate in gaps between crib sides and a mattress that is too small.

Infants can suffocate on soft bedding. Never add a pillow or comforter. Never place additional padding under an infant.

To reduce the risk of **SIDS**, pediatricians recommend healthy infants be placed on their backs to sleep, unless otherwise advised by your physician.

Strangulation Hazard:

- Strings can cause strangulation! DO NOT place items with a string around a child's neck, such as hood strings or pacifier cords.
 - DO NOT suspend strings over a crib or attach strings to toys.
 - To help prevent strangulation tighten all fasteners. A child can trap parts of the body or clothing on loose fasteners.
 - DO NOT place crib near window where cords from blinds or drapes may strangle a child.
-

Fall Hazard:

- When child is able to pull to a standing position, set mattress to lowest position and remove bumper pads, large toys and other objects that could serve as steps for climbing out.
- Stop using crib when child is able to climb out or reaches the height of 35 in. (89 cm).
- Check this product for damaged hardware, loose joints, loose bolts or other fasteners, missing parts, or sharp edges before and after assembly and frequently during use.
- Securely tighten loose bolts and other fasteners.
- DO NOT use crib if any parts are missing, damaged or broken.
- Contact Oeuf LLC for replacement parts and instructional literature if needed.
- DO NOT substitute parts.
- If refinishing, use a non-toxic finish specified for children's products.
- Follow warnings on all products in a crib.

CAUTION: ANY MATTRESS USED IN THIS CRIB MUST BE AT LEAST 27-1/4 INCHES BY 51-5/8 INCHES WITH A THICKNESS NOT EXCEEDING 6 INCHES.

WARNING

- Do not use this crib if you cannot exactly follow the instructions that come with it.
- Do not use this crib for a child who can climb out of it or who is taller than 90 cm.
- Do not place any cord, strap or similar item in or near this crib that could become wrapped around a child's neck.
- Do not place this crib near a window or patio door where a child could reach the cord of a blind or curtain and be strangled.
- Check this crib regularly before using it, and do not use it if any part is loose or missing or if there are any signs of damage. Do not substitute parts. Contact the manufacturer if replacement parts or additional instructions are needed.
- Children can suffocate on soft bedding. Do not place pillows, comforters or soft mattresses in this crib.

WARNING: TO PREVENT FALLS THE MATTRESS BASE OF THIS COT SHOULD BE ADJUSTED TO THE LOWEST POSITION BEFORE THE CHILD CAN SIT UP

RECOMMENDED MATTRESS SIZE This cot has been manufactured for use with a mattress which measures 700 mm wide by 1300 mm long and 120 mm in thickness.

The width and length are specified because it is important that the gaps between the mattress and the sides and ends of the cot will not exceed 40 mm. This is to minimize the risk of a child's limb becoming caught in the gap.

The thickness of the mattress has been specified to ensure that the depth of the cot is greater than 500 mm with the mattress base in the lower position to minimize the risk of a child climbing or falling out of the cot.

Care & Maintenance

- When cleaning your cot, use a non-toxic, non abrasive cleaner. Mix a solution of water with a small amount of a mild detergent. Apply to bed surface with a damp cloth.
- When moving the cot without castors assembled, always lifts the unit. Do not push or drag it to avoid damaging the base.
- It is important that the humidity levels in the room be controlled from extremes of too much humidity or too little. The bed should not be placed directly next to air-conditioning, outlets, fire places, radiators, space heaters, humidifiers, or dehumidifiers.
- Exposure to extreme variations of temperature and humidity can damage wood products.
- Keep the bed out of direct sunlight. UV rays may fade colors and in some cases darken them. It can cause crazing or hair line cracks in the finish. White finishes will darken naturally over time and exposure to direct sunlight will hasten this natural process along with some wood darkening; this is not considered to be a quality defect.
- If you need to put your cot in storage for any period of time do not store it in a damp or hot environment. Allow air flow around the furniture and do not stack anything on it.

Check List

- Always check the bed is free from damage before use. Do not use product if any damage is present.
- Regularly check that all assembly fittings are always tightened properly and retighten as necessary.
- Do not over-tighten fittings.
