TRESTON

Cornerstone workstations are suitable for a variety of uses! With customizable workbench options, Cornerstone can be accessorized for use in laboratories, packing, fulfillment, assembly, testing, or quality assurance functions.

Customer Improves Efficiency with Treston's Cornerstone Workstation

Specializing in ergonomic and ESD workspaces, Treston provided solutions that met each of MCPc's needs. ESD worksurfaces saved technicians time and energy, and guaranteed protection for their devices. Treston benches are highly adjustable and modular for configuration in a variety of ways, using standard parts. The flexibility this offered MCPc was the biggest factor in their decision to choose Treston over a competitive product. "With a fleet like this, I can almost literally put any project anywhere. A lot less handling, a lot less shuffling of people and projects. It just makes it easier" says Leonard. The Concept and Cornerstone benches MCPc chose can also support a high degree of weight, offering MCPc the durable solution their equipment requires.
