BOSCH

Invented for Life

From the very beginning, Bosch's history has been characterised by a drive for innovation and social commitment. Environmental and social responsibilities are core values at Bosch. Our slogan "Invented for life" conveys the ambitious standards we have set ourselves and the values that we have long stood for. "Invented for life" stands for reliable technology designed and built to last. At the same time it embodies innovations and technology that contribute to the conservation of resources, sustainable development, and helping people improve their quality of life.

The Robert Bosch Stiftung (Robert Bosch Foundation) was established in 1964 to keep alive the philanthropic and social endeavours of its founder Robert Bosch. Through its programs and institutes, the foundation has since issued 840 million euros in project funds. In 2007, it made available 58.9 million euros for non-profit projects. Education, international understanding, and public welfare are the top priorities stated in Robert Bosch's will and are the pillars of our work today.

Responsibility for the environment is a core value at Bosch and is firmly anchored in our principles for safety and environmental

protection. Our environmental focuses are on renewable energies, energy efficiency, and emissions reduction. At Bosch we believe we have an obligation to develop innovative and beneficial technology and in order to meet such demands, considerable amounts of money are spent each year on research and development. We employ more than 25,000 research and development associates worldwide, all working towards the creation of technology that is innovative, beneficial and environmentally friendly.

The Bosch Automotive Story

The Bosch Group is a leading global supplier of technology and services, with more than 300 subsidiaries and regional companies in over 50 countries.

The beginnings were humble. In 1898 Robert Bosch developed a magneto ignition device and adapted it to suit a vehicle engine. In doing this he developed the first reliable ignition system, solving one of the greatest technical problems faced by the automotive industry at that time. This key innovation was the first chapter in the success story of Bosch as an automotive supplier.

From 1902 Bosch developed a high voltage magneto ignition system incorporating spark plugs. While the magneto ignition has long since been replaced by battery ignition systems, Bosch today manufactures more than 300 million spark plugs per year, using the very latest precious metal technology.

As cars became a product for the masses, Bosch recognised the prospects for developing motor vehicle lighting. Research in this area resulted in the launch of the Bosch automotive lighting system, comprising of headlights, a generator, a regulator and a battery. This was a significant milestone for both Bosch and the industry, being the first all-in-one system available to consumers, and also the basis for components such as starters, horns, windshield wipers, indicators and car heating systems to be developed and added to the business.

From about 1920, the growth of diesel engines in trucks was a concern at Bosch, because diesel engines did not need an ignition system, the company's main sales driver. To capitalise on this technological advance, Bosch began developing diesel injection pumps and in 1936 launched the first diesel injection pump for passenger cars. Today, Bosch is the global leader in diesel technology, whether it be for passenger cars, trucks or injection systems for ships.

In the years that followed, Bosch made numerous developments with other automotive products. Gasoline injection systems were developed from

1935 and by 1967 had all but displaced the carburettor. Braking systems have also been part of the Bosch offering since 1927. The introduction of the Bosch ABS antilock braking system in 1978 was a significant development in vehicle safety, laying a foundation for the development of further systems, such as Traction Control and the Electronic Stability Program (ESP®).

In today's market, vehicle manufacturers and service organisations face the worldwide challenge of efficient service for highly evolved vehicle systems. This includes not only mastering the electronic systems in today's automobiles, but also utilising the latest state-of-the-art diagnostics technologies to improve servicing efficiencies. The growing range of Bosch diagnostic and service equipment delivers a sophisticated solution for today's workshops to meet these challenges.

Bosch spends billions of dollars annually in research and development to preserve its position as a technological leader. The company's technological competence is evident in the fact that Bosch is world leader in the number of automotive technology patent applications it submits each year. Every hour Bosch research teams create new patents to make Bosch products safer, more efficient and more environmentally friendly.

As one of the world's largest independent manufacturers of automotive parts and systems, Bosch products and technology, supplied through a global network of factories, can be found on virtually every make of car currently produced throughout the world. This strong link to original equipment development and innovation means Bosch is able to deliver a superior aftermarket offering to its customers.

With most vehicles on the road incorporating many Bosch manufactured components, it made sense for Bosch to support these products with local service centres. Bosch Authorised Service Dealers are a group of over 14,000 independent workshops worldwide, offering the latest technical expertise, tools and equipment to motorists.

In just over a hundred years, Bosch successfully transformed from a small automotive supplier into a modern, multinational group, which today has a workforce of more than 270,000 people worldwide.

Bosch employs over 2,300 associates in Australia and New Zealand with activities spanning three business sectors: Automotive Technology, Consumer Goods and Building Materials, and Industrial Technology.

During the past five decades Bosch has grown into a major force in the Australian automotive industry. Today, Robert Bosch Australia is no longer a local company manufacturing automotive components only for Australian customers. It is truly an integrated member of the Bosch global network supplying overseas customers in Europe, Asia and America.

In the automotive industry the name Bosch is now synonymous with leading technology, sophisticated service solutions and high quality replacement parts.

Introduction

97% Market Coverage

Bosch is one of the largest suppliers of automotive belts to the Australian and New Zealand market, offering comprehensive market coverage for Australian, Asian and European vehicle applications. In fact, Bosch Drive Belts now cover over 97% of the market.

Original Equipment Quality

All Bosch Drive Belts are made to Original Equipment specifications which is a guarantee of the highest possible quality standards.

Stronger Design

Bosch Drive Belts feature pre-stretched polyester tension cords, fibre reinforced belt backs and stranded glass fibre tension cords to ensure low maintenance and lateral stiffness. These features also provide the highest level of protection from engine damage.

Longer Life

Bosch Drive Belts are highly resistant to abrasions, oil, grease, water and UV radiation. As temperatures in the engine compartment vary between -30°C and +180°C this offers greater stability and longer life.

Higher Performance

The task of the Raw-Edge cogged belt and V-Ribbed belt is essentially to transfer energy to accessories and auxiliary devices such as the alternator and air-conditioning compressor. This takes place through the frictional connection between the belt and the drive pulley. Due to the high dynamic forces to which the belt is exposed, it has to have especially high tensile strength and be dimensionally stable, both longitudinally and shape-wise. It also has to be laterally stable at right angles to the direction of travel. Bosch Drive Belts satisfy these requirements and deliver higher performance in the process.

Quieter and Cooler Operation

Bosch Drive Belts have been designed to run more quietly and cooler than standard belts. This increases driver comfort and belt life.

Bosch Raw-Edge Cogged Belt (V-Belt)

- ▶ Replaces all belt types: wrapped belts, raw-edge plain belts as well as cogged belts.
- ▶ Longer service life - up to three times that of wrapped belts.
- ▶ Made to original equipment specifications.
- ▶ Runs more quietly.

Internal cogged construction minimises bending energy loss and ensures maximum torque transmission.

Bosch quality made to Original Equipment Specifications. High tensile cord construction gives longer service life.

BELT SIZE DESIGNATION

Example :

| | | |
|-----------|----------|-------------|
| 11 | A | 0900 |
| 13 | A | 1395 |

Belt type ←
 Automotive ←
 Belt Length ←

eg: 0900 = 900mm
 1395 = 1395mm

Top Fabric

Strong, wear resistant, bias-cut fabric protects the top of the belts without losing flexibility.

Tensile Cords

Pre-stretched, strong polyester cords are placed in a straight line, providing less stretch and high horse power rating.

Compression Rubber

Fibre chip reinforced rubber compound is used to provide high friction coefficient, excellent wear resistance & high flexibility.

Laminated Bottom Fabric

Crack resistant, highly flexible fabric impregnated with oil and heat resistant rubber compound.

Moulded Cog.

Unique cog design resulting in longer flex life over small high speed sheaves.

Belt Type

| Belt Type | 11A | 13A | 15A | 17A | 20A |
|----------------|------|------|------|------|------|
| Width - a [mm] | 10.7 | 13.3 | 17.3 | 18.8 | 22.8 |
| Height -b [mm] | 8.0 | 9.0 | 11.0 | 11.0 | 13.0 |
| α [°] | 38 | 38 | 38 | 38 | 38 |

Improved Cog Belt Design

Improved Cog belt design for 11A and 13A belt series to reduce resonant noise.

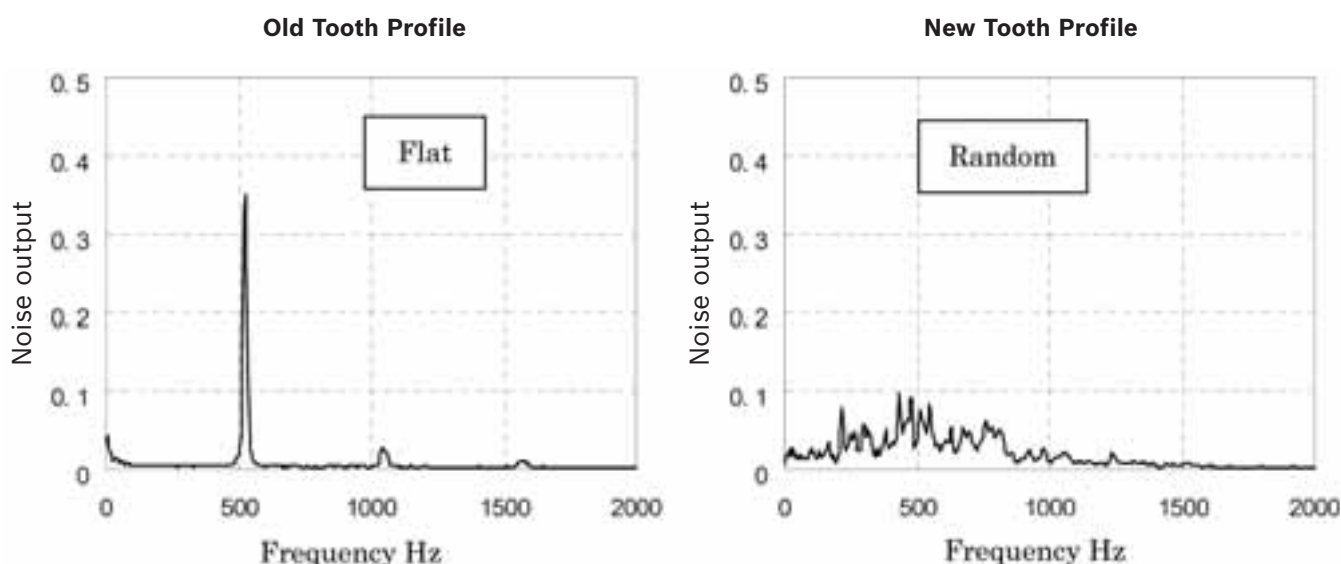

Bosch is successfully introducing the new cog profile into the market to widen the range of cogged drive belts.

The new design features a change from a uniform tooth profile and flat pitch to a unified profile and random pitch (across approximately 5 teeth).

The new design is considerably quieter and does not produce the common resonant peak in the noise level which in some applications can be annoying to customers.

Comparative Diagrams

As can be seen from the comparative diagrams, random cog belts do not produce a resonant peak in the noise output. The peak noise is usually located on the shortest span whereas longer sections tend to have a dampening effect.

Bosch Multi-Ribbed Belt

- ▶ **Made to Original Equipment Specifications.**
- ▶ **Long Life Design.**
- ▶ **Heat, Oil and Crack Resistant.**

Engineered for better flexibility and less heat build up resulting in longer life and superior operational efficiency. Its high flexibility and efficiency in power transfer makes it ideally suited for serpentine drives.

Cover Fabric

Wear and crack resistant, flexible bias-cut cotton fabric impregnated with oil and heat resistant rubber compound.

Tensile Cords

Pre-stretched strong polyester cords give minimum stretch and maximum power transfer.

Rib Rubber

Fibre chip reinforced rubber compound is used to provide high friction coefficient, excellent wear resistance and high flexibility.

BELT SIZE DESIGNATION

Example :

5 PK 1380

Bosch Double V-Ribbed Belt

- ▶ **Made to Original Equipment Specifications.**
- ▶ **Long Life Design.**
- ▶ **Heat, Oil and Crack Resistant.**

Bosch V-Ribbed belts have a fibre-reinforced backing and a large power-transmitting surface area, which gives them high tractability and keeps the belt secure in the pulley. They generate little noise in running and ensure the reliable functioning of all auxiliary devices. The double V-Ribbed belt is shaped on both sides, designed for a high level of power transmission.

BELT SIZE DESIGNATION

Example :

6 DPK 1825

Installation Guide

Cogged Belts & Ribbed belts

Step by step installation

1. Loosen the bolts and nuts without damaging the pulley groove.
2. Remove the belt to be replaced.
3. Keep the pulley groove free from grease and oil.
4. Replace the pulley if any wear and tear or other damage is noticed in the groove.
5. Check and correct any misalignment of the pulley as any misalignment will shorten the belt life.
6. Install the new belt and tighten the belt, bolts and nuts according to the engine manufacturer's specifications.

V-Belts & Multi-Ribbed Belts

For Springloaded tensioner drive belts.

1. Before removing belt, note routing.
Most vehicles have a decal to show drive belt routing and it usually shows which pulley is the tensioner and the direction of tensioner movement.
2. A routing diagram may also be provided in the owner's manual. If no routing diagram is provided, sketch a diagram before the belt is removed.
The spring loaded tensioner pulley must be moved in a direction away from the belt to release tension.
3. Remove the belt to be replaced.
4. Keep the pulley grooves free from grease and oil.
Check condition of pulleys and tensioner for any wear and tear or other damage.
Most tensioners have a square hole in the tensioner body so that a breakover bar may be used for leverage.
5. Install the new belt and tighten by allowing the tensioner to return to the correct position according to the engine manufactures specifications.
6. Check and correct any misalignment of the belt as any misalignment will shorten the belt life.

Replace Auto Belts when:

- ▶ Cracks appear on bottom side or side wall of the belt.
- ▶ Cover fabric wears off and the rubber is seen.
- ▶ The belt appears greasy or swollen.
- ▶ Belt cord protrudes.
- ▶ According to engine manufacturer's specifications.

Tensioning V-Belts & Multi-Ribbed Belts

Correct tensioning is critical for optimum belt life and performance. This is especially so with the higher tension ranges required to satisfy the tough demands on belts for today's vehicles.

For correct tension use an appropriate belt tension checking tool and follow the procedure below.

1. When a new belt is installed apply a force of 10kg at the centre of the span and the tension bracket when the belt is deflected by the amount indicated in the chart below under New Belt.
2. After running the engine for 5 to 10 minutes, re-tension the belt following the procedures in point 1 but use the re-tensioning column in the chart below for correct amount of deflection.
3. Check the tension periodically and re-tension whenever the deflection is greater than the Re-Tensioning column with 10kg of force.

| Belt Type | Deflection [amount per 200mm Span Length] | |
|---------------------|---|---------------|
| | New Belt | Re-Tensioning |
| V-Belt | | |
| 11A, 13A | 6 - 8 | 8 - 10 |
| 15A, 17A | 5 - 7 | 7 - 9 |
| 20A | 4 - 6 | 6 - 8 |
| | | |
| Multi-Ribbed | | |
| 3 Ribs | 6 - 8 | 8 - 10 |
| 4 Ribs | 5 - 7 | 6 - 8 |
| 5 Ribs | 5 - 6 | 6 - 7 |
| 6 Ribs | 4 - 5 | 5 - 6 |
| 7 Ribs | 3 - 4 | 4 - 5 |

Storage of Automotive Belts

To prevent deterioration, the following should be observed when storing automotive belts.

- 1 Do not expose belts to sunlight during storage. Keep belts at room temperature.
- 2 Keep belts away from oil, grease and steam.
- 3 Store belts on shelves or hang them from racks. Avoid placing belts on the floor or ground.
- 4 Avoid storing belts when sharply bent or piled high on one another.
- 5 Special care should be taken when storing timing belts so there is no sharp bending or creasing.

Trouble shooting

| Problem | Causes | Remedies |
|-------------------------------------|---|---|
| Excessive elongation | <ol style="list-style-type: none"> 1. Worn or badly machined pulley grooves. 2. Belts of different manufacturers on one drive. | <p>Replace pulley.</p> <p>Matched set used should be of one manufacturer.</p> |
| Belts breaking after fitting | <ol style="list-style-type: none"> 1. Belt forced over pulley damaging tension member and cover fabric. 2. Shock load. 3. Less than required belts or wrong section. 4. Drive stalled. 5. Foreign matter obstructs. | <p>Reduce drive centre distance to fit belt.</p> <p>Recheck design. Check belt tension.</p> <p>Recheck design and fit correct number of belts.</p> <p>Check causes and correct.</p> <p>Install effective guard.</p> |
| Belt wears rapidly | <ol style="list-style-type: none"> 1. Incorrect pulley groove angle. 2. Drive misaligned. 3. Small pulley diameter less than recommended. 4. Mismatched belts. 5. Belt slips. 6. Belt hits against protruding parts. | <p>Use new pulley.</p> <p>Realign drive.</p> <p>Redesign drive.</p> <p>Replace with matched belts.</p> <p>Provide proper tension.</p> <p>Check and remove obstruction.</p> |
| Belts turned over | <ol style="list-style-type: none"> 1. Drive misaligned. 2. Broken cord caused by forcing belt over pulley. 3. Incorrect pulley groove section or excessive grooves wear. 4. Shock loads. 5. Excessive belt flap. 6. High belt tension. Ingress of foreign matter. | <p>Realign drive.</p> <p>Replace belt, set correctly.</p> <p>Use new pulley.</p> <p>Apply proper tension.</p> <p>Use inside idler on slack side. Use banded belts.</p> <p>Retension. Remove foreign matter.</p> |

| Problem | Causes | Remedies |
|--|--|---|
| Excessive belt vibration | <ol style="list-style-type: none"> 1. Insufficient belts on drive. 2. Centre distance too long. 3. Low belt tension. 4. Unbalance pulleys. 5. High shock loading. | <p>Check drive's design and modify.</p> <p>Reduce centre distance. Use inside idler on the slack side. Use banded belts.</p> <p>Retension.</p> <p>Use suitably balanced pulleys.</p> <p>Use an inside idler pulley on the slack side. Use banded belts.</p> |
| Belt cannot be retensioned | <ol style="list-style-type: none"> 1. Insufficient allowance for stretch. 2. Incorrect belt length. 3. Belts from different manufacturers used on same drive. 4. Stretch caused by insufficient belts or wrong belt section for drive. | <p>Modify drive for more take up.</p> <p>Use correct belt length.</p> <p>Use matched belts of one manufacturer.</p> <p>Check drive design.</p> |
| Noise | <ol style="list-style-type: none"> 1. Drives misaligned. 2. Overloaded drive. Unbalanced pulleys. | <p>Realign. Retension.</p> <p>Redesign drive. Use balanced pulley.</p> |
| Cuts and breaks in belt base rubber | <ol style="list-style-type: none"> 1. Pulley diameter too small. 2. Excessive belt slip. 3. Outside idler pulley in use. 4. Contamination by oils and chemicals. | <p>Redesign drive with correct pulley diameter.</p> <p>Check drive's design. Ensure correct number of belts. Check belt tension.</p> <p>Replace with inside idler pulley on the slack side. Increase the size of existing idler pulleys.</p> <p>Protect drive from contamination.</p> |

WM1

Supplied without belts, so you can use your own expertise to select fast moving items

Bosch Belt Selector Part No. 8000

Find the right belt in an instant with the Bosch Belt Selector

- Measures raw-edge cogged belts and multi ribbed belts
- Ensures that you find the correct replacement belt size with ease
- Lightweight aluminium and plastic construction for ease of handling and durability

Three easy steps for determining the right belt:

- 1** Just insert the old belt on the belt selector

- 2** Pull down firmly on the sliding half of V-Belt guide. The top half of V-Belt guide automatically indicates the correct width of belt being determined:
eg: AV13 = 13mm (13A..Belt type)
AV10 = 10/11mm (11A..Belt type)

- 3** The lower half of the V-Belt guide indicates the correct length:
eg: PK = Length of multi ribbed belt (in mm)
AV10 = Length of raw-edge cogged belt (11A..Type)
AV13 = Length of raw-edge cogged belt (13A..Type)

Bosch Belt Selector

- straight forward selection
of all popular belts

Robert Bosch Australia

General Warranty Information

Introduction

All products manufactured and/or sold by Bosch Australia carry a statutory and voluntary warranty. Consumer's rights to such warranty are limited to failures and defects caused by a material or manufacturing fault within the specified warranty period.

This warranty information describes very broadly the general procedure for the settlement of warranty claims. Detailed information relating to the most commonly submitted non-warranty cases should also be reviewed prior to any warranty submission. Only genuine warranty cases are accepted.

What is a Warranty Case?

A warranty case exists when a Bosch product or spare part fails within the specified warranty period as a result of a manufacturing or material fault.

What are Non-warranty Cases?

A warranty case does not exist if the fault is caused by a violation of the operating, maintenance or installation instructions, inappropriate or improper use, incorrect handling or unauthorised repairs and modifications performed by third parties. Other examples of non-warranty cases are failures caused by foreign contamination and water entry.

Natural Wear and Tear

Damage caused by natural wear and tear does not constitute a warranty case even if it occurs within the warranty period.

Wrong Deliveries and Transit Damage

Wrong deliveries, incorrect or damaged packing and transit damage claims are not warranty cases and will not be processed as a warranty claim. Such cases should be directed to Bosch Customer Service on 1300 30 70 40.

Warranty Responsibility and Evaluation

All warranty claims are to be resolved in the most economical and efficient way, either by repair or replacement. In the case of Bosch Fuel Pumps, these must be sent to a Bosch Authorised Service Dealer for warranty evaluation and/or repair.

For details of your nearest Bosch Authorised Service Dealer please call our hotline on 1300 060 060 or visit www.bosch.com.au

Initiating a Claim

If a Bosch product fails within the specified warranty period as a result of a manufacturing or material fault, consumers should:

- ▶ Stop using the goods
- ▶ Let the seller know as soon as possible
- ▶ Look after the goods until they are returned
- ▶ Return the goods, including proof of purchase (while there are no time limits, this should be done as soon as possible).

Packaging

Goods do not have to be returned with the original packaging to obtain a refund.

Warranty Periods and Proof of Purchase

The warranty period begins from the date of sale to the customer (generally the consumer). The warranty period is not renewed nor extended as a result of a warranty repair or with the supply of a replacement part. The seller is entitled to ask for proof of purchase when goods are claimed under warranty and consumers are obligated to provide proof of purchase when claiming goods under warranty. Proof of purchase will generally indicate if the purchased product is covered under warranty.

All Bosch Drive Belts are warranted as per the vehicle manufacturer's recommended replacement interval.

Deadlines for submitting Warranty Claims

Bosch Australia aims to rectify genuine quality problems as a priority. This is generally achieved by investigating why defective products have failed and by introducing immediate corrective action measures to prevent re-occurring warranty failures. It is therefore critical that all warranty cases are promptly reported to Bosch Australia. Bosch reserves the right to request the prompt return of all defective parts.

Product Liability and Product Safety

Bosch Australia should be informed immediately about potential product safety concerns within and outside the warranty period. Bosch Australia is well aware of its product liability and product safety obligations and responsibilities. It is our aim to ensure appropriate product safety standards are met in order to avoid injury, loss and damage caused by defects in Bosch products.

This publication contains the data from the vehicles, engines and equipment for the Australian and NZ market from year of manufacture 1967 up to and including the year 2008. This data has been assembled from information provided by manufacturers and importers, and taken from Bosch documentation, as well as from investigations made on vehicles.

It reflects the status as at September 2008. Whilst every care has been taken in the preparation of this publication, it is not possible for Bosch to guarantee its sources or to avoid discrepancies arising from technical changes to vehicles, engines

and equipment due to the conditions and regulations applying in Australia and New Zealand.

Bosch does not therefore warrant the accuracy or completeness of the information contained herein. Further, Bosch reserves the right to alter specifications and its product range without notice. To the extent permitted by law, Bosch excludes all liability including negligence for any loss incurred in reliance on the contents of this publication. From time to time, Bosch may (in its discretion) issue bulletins containing updates to this information to which users of this publication should have regard.

Reliable diagnosis. Time saving repairs.
Bosch diagnostics and service parts.

Everything from one single source.
Bosch has a complete program available
which increases efficiency and quality in
your workshop's daily activities.

Service parts from the global development
expert and leading manufacturer of
automotive system technology are supplied
in renowned Bosch OE quality.

Competence and quality:
Assuring your workshop's future success.
