

Full Face Snorkel Mask  
**User Manual**

# PRODUCT COMPONENTS

# FEATURES

**Anti-fog System** ---- Inhaled air contacts the viewing area before reaching the mouth and nose. When the user exhales, the exhaled air is directly discharged from the pipes on both sides, and does not contact the viewing area, thereby preventing the fog by physical means.

**Anti-leak System** ---- The float-ball design on top of the mask prevents water from being poured in from the top. When the snorkel tube sinks, the float ball will be lifted by buoyancy, blocking the air inlet, preventing seawater from pouring in. After floating out of the water surface, the ball drops due to gravity, thus opens the air inlet.

**Foldable Snorkel Tube** ---- Convenient storage, hard to lose.

**Panoramic View** ---- 180° panoramic view design creates a larger viewing area. A flat viewing panel design allows you to see things clearly without any distortion.

# INSTRUCTIONS

1. Install the snorkel tube, fasten the buckle, and cover the lid.

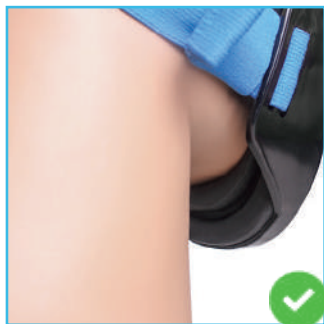

2. Move any hair on your forehead all the way to the side. Men are recommended to shave any facial hair to prevent gaps that could cause water leakage.

3. Move the mask up and down, left and right, until the V - shaped silicone section inside the mask fits perfectly with the face.

4. Pull the elastic bands on both sides towards the back of the head until the silicone is tightly attached to the face. A snug fit prevents fogging and water leakage.

5. After securing the mask to your face, check again that there are no gaps at the chin.

## PRECAUTIONS

Check the product and parts before each use to ensure that all valve pieces are intact and flatly sealed. Do not use if the product is found to have cracks or any other damage.

In case of water leak or fogging during product use, please remove the mask and reapply following the instructions.

This product is only for snorkeling.

Do not wear the mask to dive, as this may break the mask and cause serious bodily injury.

When submerging yourself completely, avoid vigorous exhalation to prevent the top float-ball from opening.

Do not scuba dive, free dive, or engage in high-intensity swimming while using this product. This product is not suitable for these high-intensity sports.

Do not disassemble or repair the product on your own, as it could lead to accidents.

If you experience dizziness or shortness of breath while using this product, please stop using it immediately.

Keep away from children. This product is not suitable for children under 12 years old.

It is recommended for use in water temperatures between 18-45 °C, to avoid fogging due to temperature.

## **MAINTENANCE**

---

Make sure there is no sand inside the mask and snorkel before each use, and if necessary, rinse the mask with plenty of warm water. Confirm that all foreign matter is removed (salt, sand, seaweed, etc.).

Do not expose the mask to direct sunlight for long periods of time.

Avoid contact between the mask and hard objects such as sand and gravel, which will create scratches on the mask.

Keep the mask dry after use.

Avoid contact between the mask and any solvents or detergents.

## ACCESSORIES

---

Action camera mount and screw x 1

Earplug x 1 pair

Gasket x 1
