FEATURES	Easy care routine No maintenance required		
SUITABILITY	Indoor Outdoor Wet Areas [†]	USE	Architectural Pre-cast Screen

PRODUCT DESCRIPTION AND INSTRUCTIONS FOR USE

Limesite™ Zephyr block

The Zephyr block is a masonry product, designed to function as a building material that incorporates a distinctive aesthetic, ventilation and privacy to spaces through its design. The Zephyr block is manufactured from waste by-products of Limesite which contributes to sustainable architecture together with its cross-ventilation properties.

Guidelines

The Zephyr block are to be installed as one would install brick and mortar.

We highly recommend a 15mm mortar joint between the blocks.

The breeze blocks are to be installed with SABS approved cement using best possible installation practice.

The unit can be glued to any surface that has been prepared for it.

This product does not require any maintenance and will age naturally.

Disclaimer:

Colour variance is an inherent property of our products as they are handmade and colour may vary from product to product. The onus is on the client to confirm colours by looking at physical samples and completed projects. Custom colour development available on request. Please refer to the website for more information.
