On your outdoor irrigation needs in comparison to traditional lawn & landscaping.

Ranch

LANDSCAPE PLAN

A big swath of California's most ubiquitous native grass offers farm feels for the new landscaping era. Pretty flowering trees, drought-tolerant hedging, autumn sage & thornless prickly pear round out this bird-friendly beauty.

DROUGHT TOLERANCE

Big water-savvy plants make this massive corner lot plan a stellar and affordable option for new landscaping.

SEASONAL CARE

Prune/shape hedges anytime of year. Cut back Autumn Sage and Russian Sage by 1/3 in late fall.

SOIL REQUIREMENTS

Mostly easy going plants. Cactus & Coyote brush thrive with excellent drainage or rocks in their planting holes.

WATER SMART FEATURE

GREYWATER a laundry to landscape system provides ample irrigation to trees (without adding to your water bill!)

PURPLE PLUM
or Cercis 'Forest Pansy', or Crêpe Myrtle

RUSSIAN SAGE
Perovskia

THORNLESS PRICKLY PEAR
Opuntia

DEER GRASS
Muhlenberia rigens

FEATURE PLANTS

Native Grass & Low-Water Hedges

This perfect pairing of silver and gold shines in fall when Deer grasses bloom beside Westringia 'grey box' hedging. Big yellow bells (Tecoma) & winter-berried Toyon give seasonal interest while cute and vibrant autumn sages replace traditional rose-lined walkways.

SALVIA 'HOT LIPS'
Autumn Sage

WESTRINGIA 'GREY BOX'
Aus. Rosemary

FLOWERING TREES showy trees & large shrubs help to fill a large corner lot and hedge in sensitive areas.

OPUNTIA FICUS INDICA
Nopales

MUHLENBERGIA RIGENS
Deer Grass

Deer grass shows off in this fall-fresh design. Part shade tolerant & low-water a winter trim or heavy rake out resets it for spring green in the new year. Most water-savvy of ornamental grasses, it even works great in shade (oak friendly!). For shade yards, substitute Prickly Pear with Blue Agave and Autumn sage with Salvia Spatheca.

Laundry2Landscape Grey Water

Grey water systems are an incredible water recycling option. One day everyone will have one! Get ahead of the curve with this no-permit-necessary grey water setup.

The average washing machine (for a 3 person house hold) cranks out 50-100 gallons a week of laundry water. Most laundry soaps are compatible with this system but avoid bleach.

SIMPLE MULCH PIT

Where to build Rain Gardens

If you're washing machine is on an exterior wall or raised foundation, it can be a relatively quick procedure to install grey water connections (though the valves required are expensive).

Run water lines to the nearest trees (or fruit trees if you have many). You can have up to 10 omission points and 100' of total pipe distance on flat or down sloped terrain (30-50 feet on slight inclines).

INSTALL VALVE

Jandy valves ensure water containing disease causing micro-organisms (like blood or stool) can be redirected to the

RUN PIPE 4" BELOW SURFACE

All water omission should occur below at least 4-6" of woodchip for proper filtration and to ensure no unwanted smells.

DIG OUT / INSTALL MULCH PITS

Dig out a hole 3x the size of a one gallon pot approximately 1-2' from the base of your tree. Place a planting pot or irrigation house in it and run the hose end to it's center. Fill entire hole with woodchip and bury the top 4"

TRADITIONAL MULCH PITS

The mulch pits shown below are the most targetted method for releasing grey water into the landscape. However, you can also run a single hose into a swale or bury it in a dry stream bed for omission (burying the omission point in gravel for filtration works too).

NEW GREY2GREEN PIPE

A new type of grey water distribution pipe was recently developed by the co. Grey2Green in Anaheim. It's sheet irrigation style is best suited for thirsty lawns and shallower rooting plants.

GREY WATER SYTEM

MULCH PIT

CALIFORNIA GOLD NATIVE BENTGRASS

Agrostis pallens lawn sod. Prefers night-time watering and regular mowing OR a once every 3 month string trim for a shaggier look.

Plant the Difference

Plants have a big impact on our climate. Making the difference between a desert and an oasis. Thankfully there's a multitude of beautiful ones that thrive on less water!

How to Shop Nurseries

Always start with your biggest plants first! It's easiest to work backwards in the garden. Few nurseries will have everything, so be prepared to check all your favorite spots. And maybe find a new one that specializes in natives & drought tolerants too.

How to Order Online

To shop individual plants online try Plants Express, Annie's Annuals or High Country Gardens.

To order bulk visit Calwildgardens.com/greeneryards and enter the total square footag of the garden or lawn area you wish to purchase. Free Shipping to Sierra Madre on weekday delivery date of your choosing.

TOYON

Large growing shrub – famous namesake for Hollywood – supports native bird populations and provides large easy-going hedging.

BROUGHT TO YOU BY

SI
MA
DRE

YELLOW BELLS/ELDER

Fast-growing large shrub & American native. Can spread so plant close to sidewalks or hardscape edges where natural boundarings exist.

'PIGEON POINT' COYOTE BRUSH

Handsomely mounding low-growing groundcover that covers large areas where drainage is adequate.
