How To Use Preferences

PASSPORT is ready to go when AT&T, including 3G and 4G LTE signals, is available where you are. Before you begin using your PASSPORT, please review your preferences. There are 15 user-selectable preferences to assist you with your specific driving needs.

The buttons labeled “MRK” and “BRT” are used to enter Preferences, change from setting to setting, or hold the button to scroll through the detector, and is highlighted in colored graphics.

How to Use Preferences

1. To enter Preferences, press and hold the “MRK” and “BRT” buttons for 3 seconds. The word “PREF” will be displayed next to the MRK button.

2. Press the “BRT” button to change any setting. You can either tap the button to change your setting within a category or hold the button to scroll through the detector.

3. Press the “MRK” button to change any setting from setting to setting, or hold the button to scroll through the detector.

4. Press the “BRT” button to change from one category to the next.

When finished, simply wait 8 seconds without pressing any buttons, or press the power button, “A” to shut the unit off, “B” to go directly to MAIN Menu, “B” to turn the unit off, and then turn to normal operation.

An example: How to turn PASSPORT’s AutoMute feature off

1. Enter Preferences by holding both the MRK and BRT buttons down for 2 seconds. PASSPORT will beep 4 times, and will display the word “PREF” on the top of the detector, and is highlighted in colored graphics.

2. Press the BRT button to go from one category to the next. “AutoMute” will be highlighted on the screen.

3. Press the MRK button to change from setting to setting, or hold the button to scroll through the detector.

4. Press the BRT button to change the setting from ON to OFF. PASSPORT will beep twice and display your setting on the screen.

5. Press the MRK button. PASSPORT will beep twice and display your setting on the screen.

6. Release the “BRT” button when PASSPORT scrolls through all categories, it will begin beeping 4 times, and return to normal operation.

Notes for Setting Preferences

The factory setting of the “AutoMute” feature is OFF. To change the setting from OFF to ON, press the MRK button to change the setting from OFF to ON. Then press the BRT button to confirm your selection. If you want to change from ON to OFF, press the MRK button to change the setting from ON to OFF. Then press the BRT button to confirm your selection. If you have a laptop computer, you can take it out to the vehicle to download the updates.

PASSPORT features and performance depend on several factors, including but not limited to, the quality of service available where you are, the state and federal database information, your specific driving needs, and the combination of settings, and thus vary among customers. As the state and federal database is updated periodically, use of the information may require additional databases. This device complies with Part 15 of the FCC rules.
Congratulations

USB Data Port

The PASSPORT 9500ix delivers extreme long-range protection and protection from false alerts. For the ultimate in laser protection, the PASSPORT 9500ix can be used in conjunction with our Laser Shifter product. Visit our website at EscortRadar.com or call us toll-free at 800-433-3487 for more details.
