

Firmware v1.12 Release Notes

What's New in Firmware v1.12

Listed below are the new features and product enhancements available in firmware v1.12. Included in this release are the following new features:

- Added Jam-To-Kill (JTK) laser jamming feature for ZR5 and ZW5 laser shifters
- Added K-band Notch filter (24.190 – 24.210 30dB reduction), default off
- Added voice option for Jam-To-Kill (JTK) laser jamming

Enhancements

- Fixed Bluetooth issue where band enables were showing incorrectly in the app (same as found on Redline 360c).
- Fixed an issue in the ESCORT Live app where live alerts freeze on the screen of the radar detector. The new version will clear the alert and speed limit when the app loses its location for 10 seconds or more.
 - iOS: v3.1.27
 - Android: 3.1.60

How to Get the Update

The new software update is available now. You can download Detector Tools at <https://www.escortradar.com/pages/update-your-device> and connect your MAX 360c to your computer via USB. There are two different links on the page depending on if you are using Windows or Mac OS.

Keep the Feedback Coming

We want to keep hearing from you! If you have feedback or suggestions on how to make the MAX 360c even better, send an email to radarfeedback@cedarelectronics.com.
