ESCORT MAX 3

Firmware v1.1 Release Notes

What's New in Firmware v1.1

Listed below are the product enhancements and new features available in firmware v1.1, which we believe will deliver an even better experience.
Included in this release are:

Enhancements

- Improved sensitivity and performance for K and Ka radar bands

- Improved false alert filtering from Blind Spot Monitoring systems through an added K Band Notch Filter at 24.200 +/- .010 GHz programming option, default off

- Added Jam to Kill (JTK) feature to stop jamming processes after a certain period of time

How to Get the Update

The new software update is available now. You can download Detector Tools at https://www.escortradar.com/pages/update-your-device and connect your MAX 3 to your computer via USB. There are two different links on the page depending on if you are using Windows or Mac OS.

Keep the Feedback Coming

We want to keep hearing from you! If you have feedback or suggestions on how to make the MAX 3 even better, send an email to radarfeedback@cedarelectronics.com.
