

# ESCORT® MAX 3

## MAX 3 Firmware v1.3 and v1.2 (International - 2023) Release Notes

### What's New

Cedar Electronics is announcing the release of version 1.3/1.2 firmware for MAX 3 (International - 2023). We have developed several key improvements in this release which should continue to improve your experience with your MAX 3 International. Versions differ for newer models available in 2023 (microprocessor change - no performance change).

#### Enhancements for International units:

- Added Mesta detection
- Full Mesta/Gatso/MTR support for Live Alerts: Drive Smarter (iOS) & ESCORT Live (An update for an Android fix for MESTA toggle will be available in the next week or two)
- Fixed compatibility issue with ZR5 and ZW5 laser shifters
- Fixed an issue with Jam-To-Kill. If set to Shift4, and you manually disabled shifters, it would momentarily re-enable the shifters
- Added frequency read-out and improved meter ramp-up for MTR-CT

### How to Get the Update

Downloads are available directly to your MAX 3 International. Manual downloads are available using a USB connection with your PC or Mac using our website ([Update Your Device \(escortradar.com\)](https://www.escortradar.com)). If connecting through Detector Tools Pro, the server will determine which version of firmware needs to be updated. If you have any questions, please contact our customer care team at 800-543-1608.

### Keep the Feedback Coming

We want to keep hearing from you! If you have feedback or suggestions on how to make the MAX 3 even better, send an email to [radarfeedback@cedarelectronics.com](mailto:radarfeedback@cedarelectronics.com).
