MAXcam 360c Firmware v1.7 Release Notes

What's New in Firmware v1.7

Cedar Electronics is happy to announce the release of version 1.7 firmware for the MAXcam 360c. We have developed several improvements in this release which should continue to improve your experience with the MAXcam 360c and with the Drive Smarter app.

Enhancements:

- Improved stability with lock-up issues and eliminated audio distortions & popping noises
- WiFi connectivity improved for vehicles/providers which were experiencing an issue connecting to the internet
- Posted speed limits showing properly when connected to WiFi
- 3RD party integration complete (Mid City Eng/ ADS)
- TruSpeed S (laser) gun detectable
- Firmware update prompt now shows a separate prompt for Database updates (DB)
- Drive Smarter integration improvements:
    - ZR5/ZW5 connectivity
    - Watermark display
    - Posted Speed limits
    - Manual date/time change
    - Latitude/ longitude option added

How to Get the Update

Downloads are available directly to your MAXcam 360c or through the Drive Smarter app. If you are taking advantage of the Wi-Fi connection in your vehicle or have access to Wi-Fi, you will be prompted for the update once it becomes available. Alternatively, you may now use our app, Drive Smarter, to connect your MAXcam 360c and update firmware from your smartphone.

Manual downloads using a USB connection with your PC or Mac are available if you are unable to utilize either the WiFi update directly with your device or if you are having issues with updating through the Drive Smarter app (Update Your Device (escortradar.com)). If you have any questions, please contact our customer care team at 800-543-1608.

Keep the Feedback Coming

We want to keep hearing from you! If you have feedback or suggestions on how to make the MAXcam 360c even better, send an email to radarfeedback@cedarelectronics.com.
