Pre-loaded DEFENDER Database

Outstanding Performance and Value
You’ve purchased the all-new PASSPORT which is the one of the most advanced high-performance radar and laser detector on the market. The PASSPORT provides long-range warning on all radar bands and laser bands.

The PASSPORT introduces the following state-of-the-art performance and features:

- Long-range K and Ka-band radar performance, including instant-on POP mode.
- Exclusive AutoSensitivity intelligently filters out annoying false alarms, plus Highway, Auto, and Auto No X settings.
- Exclusive ExpertMeter tracks and displays up to 4 radar signals simultaneously.
- Exclusive SpecDisplay provides actual numeric frequency for any radar signal and alert bar.
- The PASSPORT now with built in Bluetooth® technology gives you access to ESCORT’s award-winning app, ESCORT Live.

Features when connected to ESCORT Live:

- Our exclusive real-time ticket protection network, which warns you of upcoming alerts received by other users in the area.
- Our DEFENDER Database, which warns you of verified speed traps, speed cameras, and red light cameras.
- Our most popular GPS-powered features, including speed-limit data for over-speed alerts, live traffic data for your current location, and TrueLock™ to help eliminate false alerts. You can also Mark Locations for future reference.

You’ve purchased the all-new PASSPORT which is the one of the most advanced high-performance radar and laser detector on the market. The PASSPORT provides long-range warning on all radar bands and laser bands.

You’ve purchased the all-new PASSPORT which is the one of the most advanced high-performance radar and laser detector on the market. The PASSPORT provides long-range warning on all radar bands and laser bands.
Before downloading ESCORT Live, you must first register your PASSPORT device. Be sure to have your PASSPORT unit nearby, as you will need the serial number located on the bottom of the case.

1 Visit www.EscortRadar.com and click Product Registration.
2 Click the link for Escort Live Ready devices.
3 Follow the onscreen instructions to register your device.

Be sure to write down the username and password you create, as you will need this information to access and download ESCORT Live. (You will also receive an e-mail with this information, once you have registered your device.)

To pair your Smartphone with PASSPORT:
1 Ensure PASSPORT power is ON.
2 On your Smartphone go to Bluetooth Settings.
3 Ensure Bluetooth is ON.
4 Press Scan for devices and/or wait for the device list to populate, PASSPORT should appear under devices.
5 Tap PASSPORT to pair the device to your phone.
6 Bluetooth icon on the PASSPORT display screen will appear blue when paired to the phone.
7 Open the app, walk through the tutorial, and you're ready to hit the road!

For Bluetooth pairing tips and more information on using ESCORT Live visit: www.EscortRadar.com
**Power**
Press to turn PASSPORT on or off

**Brightness (BRT)**
Press to adjust display brightness (Min, Med, Max, Dark)

**Vol-Mute**
Press to mute an alert; Press and hold + or − to adjust volume

**Mount Release**
Press to remove device from mounting bracket

**Display**
Alert area

**Sensitivity (SEN)**
Press to adjust detector sensitivity (Highway, Auto, Auto NoX)

**Important!** Actual speed and live alerts will not be shown on your PASSPORT if your smart phone does not have good GPS reception.

---

**Installation**

**What’s Included**
PASSPORT’s EasyMount windshield bracket is designed for unobtrusive and hassle-free mounting.

**Mounting Tips**
- Center of windshield between driver and passenger.
- Ensure clear view of road ahead and sky above.
- Avoid windshield wipers and heavily tinted areas.

**PASSPORT Mounting Location:**
WARNING: ESCORT cannot anticipate the many ways PASSPORT can be mounted. It is important that you mount PASSPORT where it will not impair your view nor present a hazard in case of an accident.

For optimum detection performance, we recommend the following:
- Using the Windshield Mount, mount your PASSPORT level, and high enough on your front windshield to provide a clear view of the road from the front and rear.

To ensure that the suction cups adhere to the windshield firmly, be sure to keep both your windshield and the suction cups clean.

1. Depress the adjustment button on the top of PASSPORT (by the word ESCORT) and slide the EasyMount Bracket into the slot until it is locked into the position which best fits the angle of your windshield (there are four settings available). For extremely horizontal or extremely sloped windshields, the EasyMount Bracket can be bent.

2. To adjust the PASSPORT on your windshield, use the EasyMount adjustment button located on the top of the PASSPORT, and slide PASSPORT forward or backward to obtain a level position.

When installed and adjusted properly, the back top edge of the PASSPORT should rest solidly against your windshield.

**User’s Tip:** You can leave the EasyMount bracket in place on your windshield, and easily remove PASSPORT by pressing the adjustment button and sliding PASSPORT off the mount. Again, be sure to position the bracket where it won’t present a hazard in the event of an accident.

Additional mounts are available at EscortRadar.com

**Using PASSPORT:**
1. Plug small end of SmartCord into modular jack on PASSPORT and large end of SmartCord into your car’s lighter/accessory socket.
2. PASSPORT should power on automatically. If not, press the device’s power button.

**Using SmartCord**
- Mute Button: Press to mute an alert. (When connected to ESCORT Live!) Press mute button three times to lock out a false alert; press twice while receiving a locked-out alert to unlock. Press and hold mute button on unit or cord to manually report to other users a verified X or K-band alert, or a police officer observing traffic.
- Alert Light: Blinks orange when receiving an alert.
- Power Light: Lights blue when receiving power.

---

**Controls & Features**

**Earphone Jack**
Connects to optional 3.5 mm stereo earphone.

**Modular Jack**
Connects to SmartCord for powering your device

**Mini USB Jack**
Connects to your computer via USB A / Mini B cable for downloading software updates

**Important!** Actual speed and live alerts will not be shown on your PASSPORT if your smart phone does not have good GPS reception.
Controls & Features

Volume

To adjust PASSPORT to your preferred audio level for alerts, simply press and hold VOLUME + or –. The audio will increase/decrease while it is depressed. Once you reach the desired audio level, simply release the button. PASSPORT will retain this setting in its memory, even if the system is turned off.

Mute

The MUTE button allows you to silence the audio during an alert. Simply press the button during the alert. Once the radar encounter has passed, the mute will disengage, and the audio will return to your pre-set level. You can also silence an alert by pressing the SmartCord MUTE button.

AutoMute

Your PASSPORT also includes ESCORT’s patented AutoMute feature. Once PASSPORT alerts you to a radar encounter at your selected volume level, it automatically reduces the volume more than 50%. This keeps you informed without the annoyance of a continuous full-volume alert. If you prefer, you can turn the AutoMute feature off. See the Settings & Preferences section for details.

SmartMute

If AutoMute has already reduced the volume for one alert and a higher-priority band is detected, PASSPORT will sound an alert at your set volume for the second band before adjusting the volume back down to the AutoMute level.

Display Color

Your detector screen can be displayed with blue, green, red or amber accents to match the dashboard lighting of various vehicles. See the Settings & Preferences section for details on how to change the display color.

Display Brightness

PASSPORT’s display brightness is automatically adjusted to suit ambient lighting conditions in your car. (The light sensor is located inside the controller, so the display may dim momentarily when you access the buttons.) If you prefer, you can press the BRT button to set a fixed brightness level:

- Dark
- Medium
- Maximum

NOTE: If you select Dark mode, the display will not provide any indication that it is on. Therefore, only audible alerts will notify you of detected signals.

Radar Sensitivity

The SEN button allows you to select your preferred radar sensitivity: Highway, Auto or Auto No X. In general, ESCORT recommends Auto for everyday driving.

Highway

In this setting, PASSPORT will detect all radar signals on all bands at maximum range.

Auto

In this setting, PASSPORT will continuously analyze all incoming signals and intelligently adjust the sensitivity circuits, providing long-range warning with minimal false alarms.

Auto No X

Auto No X works the same as Auto mode; however, X band is completely turned off.

WARNING: Do not use PASSPORT in Auto No X unless you are absolutely certain that there are no traffic radar guns using X band in your area.

Alert Tones

PASSPORT Max’s factory default for alert tones is the ESCORT Standard mode, in which PASSPORT Max uses a Geiger counter-type sound to indicate the signal strength and type of radar signal being encountered. When you encounter radar, a distinct audible alert will sound and will increase as the signal gets stronger. This allows you to judge the distance from the signal source without taking your eyes off of the road. Each band has a distinct tone for easy identification:

- X band = beep tone
- K band = beep tone
- Ka band = double-brap tone
- Laser = solid brap tone
- Pop = solid brap tone

Mild

If you prefer, you can change your alert tone settings to Mild mode, which offers softer, simpler alert tones that are less obtrusive to the driving experience:

- X band, K band
- Ka band and Pop = Doorbell chime

Low signal strength = Double chime
High signal strength = Triple chime

If alert remains in area more than 15 seconds, display “Laser” (as a reminder)

Laser = Solid brap tone (Since laser signals are a possible threat no matter how weak, PASSPORT Max alerts you to all laser signals with a full laser alert.)

See the Settings & Preferences section for details on switching your alert tones.

Cruise Alert

The Cruise Alert feature allows you to modify your alert tones when traveling below a specified speed (factory default is 20 mph; see Settings & Preferences for details). For all alerts received while traveling below the specified speed, PASSPORT Max will sound a simple double-beep alert.

Voice Alerts

PASSPORT Max provides digital voice announcements for alerts and selection feedback. If you prefer, you can turn off the voice feature. See the Settings & Preferences section for details.

Signal-Strength Meter

PASSPORT Max offers four different settings for displaying alerts:

- Standard
- SpecDisplay
- ExpertMeter

The Standard option provides information on a single radar signal. When PASSPORT Max detects radar, it displays the band of the radar (X, K or Ka) and a bar graph of the signal’s strength. When laser is detected, the display will simply read “Laser.” (If there are multiple signals present, PASSPORT Max will determine which one is the most important threat to display.

SpecDisplay

The SpecDisplay option is an advanced display for experienced detector users. In this mode, it will display the actual numeric radar frequency being received. Even long-time detector users will require some time to get familiar with this new level of information about detected signals. To use SpecDisplay instead of the Standard bar graph meter, you must select it (Spec) in Preferences.

The SpecDisplay instead of the Standard bar graph meter, you must select it (Spec) in Preferences.

ExpentMeter

ESCORT’s exclusive ExpertMeter option is also designed for the advanced detector user. To use the ExpertMeter instead of the Standard bar graph meter, you must select it (Expert) in Preferences.

ExpertMeter simultaneously tracks up to four radar signals: Ka band, X band, K band and X band. It shows each signal along with a bar graph of its strength. ExpertMeter can help you spot a change in your normal driving environment (e.g., a traffic radar unit being operated in an area where there are normally other signals present).
### Settings & Preferences

**How to use Preferences**

To enter preferences, press and hold `SEN` and `BRT` button down for 2 seconds.

To exit Preferences, simply wait a few seconds without pressing a button. The unit will display Completed to confirm your selections.

**Overview of Preferences**

To view serial number and software revision press `SEN` and `VOL`– while powering on detector.

To restore PASSPORT to its original factory settings, press and hold `BRT` and `VOL`+ while powering on detector. Restored message will display, acknowledging the reset.

*Default Setting
CAUTION: Overconfidence in an unfamiliar area can be dangerous. Likewise, if an alert in a commonly traveled area is suddenly stronger or on a different band than usual, speed radar may be set up nearby.
Understanding Your Detector

How Laser Works
Laser speed detection is actually light detection and ranging (LIDAR). Laser guns project a beam of invisible infrared light. The signal is a series of very short infrared light energy pulses that move in a straight line, reflecting off your car and returning to the gun. Laser uses these light pulses to measure the distance to a vehicle. Speed is then calculated by measuring how quickly these pulses are reflected, given the known speed of light.

Laser is a newer technology whose use is not as widespread as conventional radar; therefore, you may not encounter it on a daily basis. And unlike radar detection, laser is not prone to false alarms. Because laser transmits a much narrower beam than does radar, it is much more accurate in its ability to distinguish between targets and is also more difficult to detect. As a result, even the briefest laser alert should be taken seriously.

There are limitations to laser, however. Laser is much more sensitive to weather conditions than radar, and a laser gun’s range will be decreased by anything affecting visibility, such as rain, fog or smoke. A laser gun cannot operate through glass, and it must be stationary to get an accurate reading. Because laser must have a clear line of sight and is subject to cosine error (an inaccuracy that increases as the angle between the gun and the vehicle increases), police typically use laser equipment parallel to the road or from an overpass. Laser can be used day or night.

How TSR Works
PASSPORT includes a new boost in anti-falsing software to eliminate excessive alerts from erroneous X and K band sources, such as traffic flow monitoring systems. These systems, which are becoming more widely used in several countries, generate K band signals to measure the flow of traffic on a given road. Unfortunately, most detectors see this as a real threat and will alert you to it unnecessarily. Our new proprietary software, TSR, intelligently sorts, ranks and rejects these types of false alarms automatically. The result is ultimate protection without excessive false alarms.

Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Explanation/Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detector beeps briefly at the same location every day, but no radar source is in sight.</td>
<td>An X band motion sensor or intrusion alarm is located within range of your route.</td>
</tr>
<tr>
<td>Detector did not alert when a police car was in view.</td>
<td>VASCAR (Visual Average Speed Computer and Recorder), a stopwatch method of speed detection, may be in use. Officer may not have radar or laser unit turned on.</td>
</tr>
<tr>
<td>Detector’s audible alerts become softer after the first few alerts.</td>
<td>Detector is in AutoMute mode. See “AutoMute” in the Settings &amp; Preferences section for details.</td>
</tr>
<tr>
<td>The power-on sequence reoccurs while you are driving.</td>
<td>A loose power connection can cause PASSPORT to be briefly disconnected and will retrigger the power-on sequence. Check all connections.</td>
</tr>
<tr>
<td>You wish to restore the factory default settings.</td>
<td>Press and hold the SEN and BRT buttons while powering on the detector. A “Restored” message will display, acknowledging the reset.</td>
</tr>
<tr>
<td>The device will not turn on.</td>
<td>Check that vehicle ignition is on. Check all connections.</td>
</tr>
<tr>
<td>The display feels warm.</td>
<td>It is normal for the device to feel warm.</td>
</tr>
<tr>
<td>The display is blank.</td>
<td>PASSPORT is in Dark mode. Press the BRT button to adjust the brightness.</td>
</tr>
</tbody>
</table>
PASSPORT is easily updated using our exclusive detector software tools found on our web site. Firmware, or the operating software for the detector, can be updated using these tools.

In order to have access to these updates, please register your PASSPORT at www.EscortRadar.com. Once registered, you will receive email notifications that updates are now available for your firmware. To handle your software you need to connect your PASSPORT to a computer first. You can connect PASSPORT to a computer via USB A / Mini B cable (not included).

To update your software, follow these simple steps:
1. Connect the mini USB end of the USB data cable to PASSPORT.
2. Plug the standard USB connector end of the cable into your computer.
4. Follow the instructions online.

ESCORT Extended Service Plan
ESCORT offers an optional extended service plan. Contact ESCORT Sales for details at 800-433-3487.

FCC NOTE: Modifications not expressly approved by the manufacturer could void the user’s FCC granted authority to operate the equipment.

ESCORT One-Year Limited Warranty
ESCORT warrants your PASSPORT device against all defects in materials and workmanship for a period of one (1) year from the date of the original purchase, subject to the following terms and conditions:

The sole responsibility of ESCORT under this warranty is limited to either repair or, at the option of ESCORT, replacement of PASSPORT. There are no expressed or implied warranties, including those of fitness for a particular purpose or merchantability, which extend beyond the face hereof. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you.

This warranty does not cover installation, removal or reinstallation charges. ESCORT is not liable for any incidental or consequential damages arising from the use, misuse, installation or mounting of PASSPORT.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

This warranty gives you specific rights. You may have other legal rights, which vary from state to state. This warranty does not apply if the serial number on the PASSPORT housing has been removed or if your PASSPORT device has been subjected to physical abuse, improper installation or modification.

The following accessories and replacement parts are available for PASSPORT:
- Coiled SmartCord
- DirectWire SmartCord
