

## Redline 360c Firmware v1.19 (North America) Release Notes

### What's New

Escort is happy to announce the release of firmware version 1.19 for the Redline 360c. Backed by both lab and field testing, this update refreshes your Redline 360c with performance improvements that translate into the real-world usability and accuracy that you depend on.

**CAUTION:** *This is a very large update. We strongly recommend utilizing Detector Tools Pro to ensure the fastest download times. If using Wi-Fi, it may take 20-30 minutes.*

### Enhancements for North America units include:

- Additional Ka Notch filter (33.750 & 35.100) added to address false alerts encountered with certain GM and Chevrolet infotainment centers.
- Includes an audio update to support the new Ka Notch filter

### How to Get the Update

Downloads are available directly to your Redline 360c through Detector Tools Pro

Manual downloads can be performed via USB connection with your PC or Mac. You can do so by visiting our website and utilizing our update program, Detector Tools Pro (Update Your Device ([escortradar.com](http://escortradar.com))). When connected to Detector Tools Pro, the server determines which version of firmware needs to be updated.

If you have any questions, please contact our customer care team at 800-543-1608.

## **What's Next**

We are always working to ensure your Escort detectors stay up to date. We are committed to delivering the same improved performance experience for our other products in the future. Although specific dates are currently unavailable, the order of expected firmware releases is as follows:

1. Redline 360c International
2. Redline Ci 360c International
3. MAXcam 360c
4. MAX 4

## **Keep the Feedback Coming**

We want to keep hearing from you! If you have feedback or suggestions on how to make the Redline 360c even better, send an email to [radarfeedback@cedarelectronics.com](mailto:radarfeedback@cedarelectronics.com).
