Congratulations. You have just purchased the most innovative and comprehensive radar/laser accessory available—SmartCord Live.

SmartCord Live uses Bluetooth® technology to communicate with your Android™ smartphone using our exclusive app. This combination of technologies gives you access to the most powerful driver alert network—ESCORT Live! (subscription may apply). You can also easily access your detector’s settings and manage alerts from your smartphone.

With ESCORT Live!, you and your fellow drivers will instantly communicate all radar/laser encounters automatically, providing the most up-to-date and accurate protection on the road.

Imagine millions of other drivers helping you Drive Smarter!

You’ll still enjoy all the state-of-the-art performance you’ve come to expect from your detector, but you’ll also have access to:

- ESCORT Live!—our exclusive real-time ticket protection network, which warns you of upcoming alerts received by other users in the area.
- Our DEFENDER Database, which warns you of verified speed traps, speed cameras, and red light cameras.
- Our most popular GPS-powered features, including speed-limit data for over-speed alerts, live traffic data for your current location, and TrueLock™ to help eliminate false alerts. You can also Mark Locations for future reference.

NOTE: ESCORT Live! enabled features are only available while running the smartphone application.

Before downloading ESCORT Live!, you must first register your SmartCord Live. Visit EscortInc.com and click Product Registration.

Pairing your Android smartphone with SmartCord Live:
1. Connect SmartCord Live to your detector and your vehicle’s lighter/accessory socket
2. Enter the Bluetooth Settings menu on your Android smartphone (typically found under Menu > Settings > Wireless & Networks > Bluetooth Settings)
3. Ensure Bluetooth is ON
4. Tap Scan for Devices, then select SmartCord Live from the list. Pairing can take up to 30 seconds. If prompted to “Accept password to pair,” tap Confirm. When SmartCord Live is properly paired, your Android smartphone will display “Paired but not connected.”

Now that you are paired with SmartCord Live, you must connect your detector to the ESCORT Live! network.

NOTE: For details on pairing your Android smartphone with Bluetooth devices, consult your phone product manual.
**Connecting your detector with ESCORT Live!**

NOTE: If you own a gps-powered detector, (9500ix or GX65) you must update your detector software using Detector Tools. Visit EscortInc.com or Beltronics.com for instructions.

1. Enter the Android Market on your smartphone and search for ESCORT Live!

2. Follow the onscreen instructions to download

3. When prompted, enter the username and password you created when registering your product at EscortInc.com

4. Once the app is launched, your Android smartphone will connect to your detector. (This may take 30 seconds.) The SmartCord Live Power/Bluetooth Light will turn solid blue to confirm the connection, and the app home screen will display a “connected” message.

5. Get started by walking through the ESCORT Live! tutorial, then you’re ready to hit the road!
