Connecting the Power

WARNING: Attempting to install SmartRadar without expertise in automotive electronic installations can cause personal injury or damage to your device or your vehicle. Consult a professional if you have no experience with 12-volt installations.

Rearview Mirror Power Connection

1. Place the wiring harness back into the slot on the rearview mirror.

Direct-Wire Power Connection

1. Plug the modular connector end of the power cord into the receiver unit's power (12 VDC) jack.
2. Attach the lug on the cord's black wire to any grounded screw under your vehicle's dashboard.
3. Unplug the wiring harness from the back of your powered rearview mirror.
4. Slide the lead from the cord's black wire into the ground slot.
5. Slide the lead from the cord's red wire into the +12V switched (powers on and off with the ignition) slot.
6. Ensure the wires have a snug and secure connection.
