

# Morro Bay Avocados

Morro Bay Avocados are produced in the northernmost growing region in California making it the official late season California avocado. The cool climate in the north slows the trees maturation process allowing the avocados to hang on the trees up to 18 months! From September through mid-November, you can now offer your customers a consistent high oil content, rich, creamy, and buttery smooth avocado.

## Morro Bay Avocados

*Season September – Mid-November*
