OUTDOOR ACCESSORIES TO POWER YOUR ADVENTURE

WARM UP

Adventure calls us into some pretty challenging conditions. Whether for work or play, you need tools that help you go beyond your limits in order to stay focused and get the job done.

When the temperature drops you can't afford to be left out in the cold. Take control with Celestron Elements multi-purpose, rechargeable hand warmers for hours of dependable heat plus added essential features that keep you in control any which way the wind blows.

RECHARGE

Charge up any of your personal USB-powered electronics with the rechargeable power bank feature available on select Celestron Elements devices. You depend on your electronics for those long flights, road trips, hunting excursions and astronomy outings. Elements will make sure their battery power levels are maintained. Perfect for recharging smartphones, tablets, MP3 players, GPS devices, and sports cameras again and again. You'll never miss a moment with these power packed outdoor accessories.

ILLUMINATE

Whether for fun, work, or survival, certain Celestron Elements hand warmers also have rechargeable flashlight features that let you shine a light on any situation. Whether it's the multi-color red and white bright LEDs, with SOS feature of the FireCel or the 300 lumen CREE® LED bulbs of the ThermoTorch, Elements with the added flashlight feature will provide much needed light for your wilderness tasks, natural disasters, or when preserving night vision is crucial.

ENDURE

Built lightweight and tough to withstand the avid outdoors lifestyle, Celestron Elements multi-function hand warmers, power banks, and flashlights are made for adventure. The classic green Elements are ergonomic, made from aluminum, and select models sport dust caps that make them weather resistant to help ensure a long life. PowerTank Go and the next-gen blue Elements all feature an IP65 water resistant and dust-proof rating and are drop and crush tested to handle the demands of rugged outdoor use. Choose which one suits your next adventure best and feel the power of the Elements in the palm of your hand.

The C-Link feature allows for interconnectability between all Elements products. This allows you to extend heat times, light times or to charge one's device's internal battery.
